I'm working on some slides (a mix of exisitng LWG and EPA issue) for you to start from. I suggest that we set the four of you up as a panel and tag team the information and provide EPA, LWG and city perspectives.. I'll facilitate to make sure we can move through the material in the hour timeframe. The two main topics are key findings from the RI and the next steps in the FS. I suspect this will be a mixed audience in terms of project knowledge, so we will need to provide a couple minutes of general background to start off with.

So, has anyone worked on getting ready for this. I think we should talk since this is happening on Tuesday.

Eric

Dear River Friends-

We are pleased to announce the River-in-Focus Brownbag for the month of March. We hope you are able to join us.

Portland Harbor: Next Steps for the Willamette's Superfund Site

The Office of Healthy Working Rivers and the Environmental Protection Agency Presents -

Portland Harbor: Next Steps for the Willamette's Superfund Site

The Environmental Protection Agency designated Portland Harbor a Superfund site in 2000 because of high levels of contamination by many hazardous substances, such as heavy metals, PCBs, dioxin, and pesticides. The site takes in the heavily industrialized stretch of the Willamette from roughly the Fremont Bridge north to the Columbia. Join Judy Smith, Chip Humphrey and Eric Blischke (EPA); and Rick Applegate (City of Portland) as they explain what we're learning about the sources and extent of contamination, and what that may mean for the major clean-up to come.
