Subject: Re: IMPORTANT - Scientific Management Decision Point: Ammocoete sampling adaptation?
Date: 10/03/2006 01:45 PM

Ammocoete catch map is attached that spatially shows how the catch of ammocoetes occured so far over the sampling area.

Note too that 20 ammocoetes were caught this morning in the upper area (~RM 15 around Ross Island). Catch at the location is the number next to the 'star' representing the sampling location 'centroid' from the FSP.

Ron
