Dear EPA,

(b) (6) [redacted]

We are told PCB's like lead will never break down - not 60 years - not 600 years, not 6,000 years but forever. Now you want to put them in a dam on the river and say "Nature will take care of it in 60 years" - Look at Hanford Nuclear Site. We were told they would not leak for 1000's of years - 30 years later they are leaking, costs us billions of dollars per year. To leave the disposal near the river is sick.

(b) (6)
