TO WHOM IT MAY concern!!

RECEIVED
OREGON OPERATIONS OFFICE
JUN 30 2016
EPA-REGION 10

In Regard to the STORY THAT APREARED IN THE JUNE 25th OREGONIAN. I WOULD Lik to ADD my SUSSestion to the River Cleanup

One of the Solutions is SALT. To some it is A Dirty Word in Portland.

SALT CAN AND DOES MANY Thingss it is A Cleanser - A Neutralizer, Plus ALL KINDS OF USES.

my Sussestion would Be to Drop or Lace the Bottom of the Contaminated AREA with 50 LB SALT BLocks (THESE ARE SALT BLocks That are used By Ranchers + Feedlots that

CAtle have to Have in their Diet, THEY

ALSO HAVE IODIZED + SULPHUR SALT BLOCKS)

I REALLY BELIEVE THAT SALT Blocks would

Neutralize the Contaminated AREA, and it would

Eventually Disappear!!

THAT is my Suggestion ~~and~~ And it is

worth looking into.
