RE: Willamette River Superfund clean-up plan – giving into big business or true environmental protection?

Using our precious waters as a toxic waste disposal dump done by liable, culpable entities or leaving the Willamette River contaminated for decades done by the Environmental Protection Agency "sweet spot" clean-up plan are both criminal.

#1 Make the clean-up with removal of the Fish Consumption Advisory in view.

#2 The toxic dredged sediments need to be removed, taken all out safely.

Please do not let big business and powerful money continue this abuse or undully influence your clean-up decisions.

The polution was extensive, the clean-up needs to be comprehensive.

Thank you,
