to whom it may concern:

I've been swimming in the Willamette River since 1959, starting near the Sub parked in the lagoon at Swan Island.

We saw raw sewage draining into the lagoon where we swam and we just moved to a different spot to swim.

Later in life I received an Associate Degree in Forest Technology from Mt. Hood Comm. College and then realized how important clean water was.

Our Willamette River is important to the people of Oregon!
