Dear EPA, A clean river would benefit people and wildlife alike. Cleaning only a small portion is useless. At least 1000 acres of sediment should be removed and not dumped anywhere ~~else in the river. People are eating~~ fish from the river now which is extremely detrimental to their health. Do it right so this will not be a problem. Make it so that people ~~can safely swim and play in or near~~ the river. Remove the sediment in a safe manner so toxins can be contained and are not released in the air, endangering communities again.

Polluters need to pick up the bill for this clean-up, not the tax payer! Thank you. (b) (6)
