Re: Clean up the Willamette River Superfund Site.

Dear EPA:
Portland is a beautiful city offering people walking and bicycling streets. We do not need to leave town to enjoy fresh air with our families: we can walk in parks and urban green spaces. For example, my husband and I have these options in SE Portland: Oaks Bottom, Spring Water Corridor and Errol Heights wetland. The Errol Heights wetland is being restored by volunteers. A beaver moved in a year ago, transforming the creek from a small

waterway to a small lake and we don't know what it will become. But we are very excited to have a wild spot in our neighborhood.

I am asking you to change your mind and decide to clean up 100% of the Willamette River Superfund Site. Please do this for our families in Portland so children, older citizens and everyone can enjoy a healthy environment where to grow. Please do this to protect our environment for future generations and to help conserve water and animals. Please do this to be an example for other cities in the US

Sincerely
