The proposed cleanup of Portland Harbor is a big win for industry and a bad deal for the public. EPA's cleanup proposal tackles just 8% of a site area that is 100% toxic. A more aggressive plan is needed to prevent even more harm to human health and the environment. On behalf of all people who rely on the river for food, recreation, employment and culture, I urge the EPA to implement a plan that:

- Moves quickly & sustainably reduces contaminants causing harm to Willamette & Columbia river resources
- Includes ongoing monitoring and cleanup upriver and downriver from the site
- Contributes to healthy fish that are safe to eat for all people
- Holds polluters accountable for creating a safer Portland Harbor

Why this is important to me:

Not sure why this even being asked of me. It seems very self-explanatory as to why this important for the entire Portland Metro region, let alone my community. 8% is not enough - FAR from it. Anything less than 100% is inexcusable and flat out negligible.

Signed,
