Update From WDFW

Message from the Director and Commission Chair

Kelly Susewind
Director,
Washington Department
of Fish and Wildlife

Every year brings new changes and new challenges to fishing in Washington, and 2019 has been no exception, including some significantly low salmon and steelhead runs.

I often hear from folks who want more fishing opportunities – I do too. But when we head out to the river, lake or sea, we also want to know that our day out isn't going to harm our grandchildren's ability to do the same. That said, we also have a lot of strong, healthy fisheries in our state and I hope all of you have a chance to get out and experience them this year.

To help, we continue to simplify fishing regulations, and you'll see results of that ongoing effort in this year's pamphlet. We also continue to refine our Fish Washington mobile app, which helps anglers see up-to-date regulations and find nearby fishing spots from their smartphone. Whether on the state's rivers, lakes, or marine waters, whether fishing for rainbow trout, halibut, sockeye, or shellfish, there are plenty of opportunities to be found for the interested recreationist.

For the 25th year since the Department of Fisheries merged with the Department of Wildlife, the staff in my agency are working hard with our partners to protect habitat, restore health to our landscapes, and give fish a better chance. While we won't be able to mitigate for all the hazards faced by endangered fish populations in our state, I know that to see improvement, we're going to have to work together on the root causes.

We're thankful for all the anglers out there who continue to support our fisheries, joining us in the agency's mission to protect, preserve and perpetuate Washington's fish, wildlife, and ecosystems. Washington is renowned for its world-class outdoor experiences, and fishing is a big part of that reputation. We want to keep that legacy alive.

As a society, we're all learning to look at our fisheries differently. We have to, if we want to see growing fish populations that let us enjoy time with friends and family in the outdoors and on the water for the next 25 years and beyond.

Washington Department of
25 Years Together
Fish & Wildlife

- **Columbia River Barbless Hooks** - Barbless hooks are no longer required when fishing for salmon or steelhead in the Columbia River mainstem from the mouth (Buoy 10) to Chief Joseph Dam, and all tributaries from the mouth to McNary Dam.

Statewide General Rules*

Harvest and Possession Rules

You May:

- Clean or portion fish or shellfish while in the field with the following exceptions: It is unlawful for an angler to fail to retain proof of compliance with species, size, number, weight, sex, or wild or hatchery origin restriction, if such restrictions apply, until the angler is ashore and has finished fishing for the day. For all rockfish species and for fish with a length restriction, anglers must retain the fish carcass until coming ashore to comply with the above rule. This does not apply if the catch is in the process of being prepared for immediate consumption.
- Use a rodholder.
- Leave your rod in a rodholder while playing or landing a fish if the rod can be easily removed from the holder.
- Use an electric powered reel attached to a pole.
- Use a downrigger if the line releases from the downrigger while playing or landing the fish.

You May Not:

- Fish in closed waters.
- Retain wild steelhead.
- Retain Dolly Varden/bull trout except where specially authorized in the special rules.
- Retain green sturgeon.
- Take, fish for, or possess Pacific lamprey, western brook lamprey, or river lamprey, or use any species of lamprey for bait.
- Harvest in freshwater any fish not classified as a Food Fish or Game Fish except for Northern pike.
- Fish for, retain, or possess canary rockfish (except in Marine Areas 1-3 and 4 West of Bonilla-Tatoosh line), yelloweye rockfish, sixgill, sevengill, or thresher sharks, pygmy whitefish, margined sculpin, or Olympic mudminnow.
- Fish for, retain, or possess eulachon (Columbia River Smelt) unless specifically open under emergency regulation.
- Fish for, or harvest fish or shellfish in an area with catch in your possession that does not meet the rules of that area. However, you may pass through such an area without stopping to fish. Also, you may catch fish in one area and land them at a port in a different area even if that different area is closed or has different rules, with the exception of landing halibut in a closed area, or landing bottomfish caught in Oregon (see page 98). Additionally, see Fish and Shellfish caught in Canada (same page).
- Intentionally waste fish or shellfish. This includes mutilating or clipping fins and then returning to the water any live fish (such as dogfish).
- Use salmon, herring, or halibut for anything other than human consumption or fishing bait.
- Continue to fish for salmon after the adult portion of the daily limit has been retained.
- Fish for (unless authorized by Special Rules) or harass fish within 400 feet downstream of a man-made dam, fish ladder, or other obstruction, or in rearing, holding, or passage facilities.
- Harvest any part of another person's daily limit, except for persons who possess a Designated Harvester Companion Card unless otherwise specified.

You May Not:

- Chum (broadcast feed) to attract Game Fish unless authorized by Special Rules.
- Remove eggs from a salmon to use or preserve them for bait without retaining the carcass from which the eggs were removed.
- Transport live fish without a permit.
- Possess fish or shellfish that do not meet the minimum and maximum size limits, weight limits, or sex restrictions, or that are in excess of the daily or possession limit.
- Possess sturgeon eggs in the field without having retained the intact carcass of the fish from which the eggs were removed.
- Possess Dolly Varden/bull trout in the field in such condition that the species and total length cannot be determined.
- Possess another person's Food Fish, Game Fish, or shellfish unless it is accompanied by a statement showing the name, address, license number, date, county, and area where it was taken, and the signature of the angler who harvested it.
- Hold recreationally-caught fish or shellfish in storage by a custom canner, hotel or restaurant, or a cold storage plant without tags listing the name and address of the owner of the fish or shellfish.
- Trespass on private property (which often includes the bed of a stream) regardless of whether there is an open season.

You are Required to:

- Cooperate with data collection or other sampling of fish, shellfish or seaweed upon request of Department of Fish and Wildlife personnel. This includes relinquishing any part of a salmon, steelhead, or other species of fish containing coded-wire tags.
- Stop at mandatory check stations established by the Department of Fish and Wildlife.
- Show fish, shellfish, and seaweed in your possession and required licenses, Catch Record Cards, and gear being used, upon request of a Fish and Wildlife officer.
- Fill out your Catch Record Card immediately upon retaining salmon, steelhead, halibut, or sturgeon. For Puget Sound Dungeness crab, fill out immediately when fishing from a boat or dock, or upon returning to shore when wading or diving.
- Return your Catch Record Card when you are done fishing or by the date printed on your card, even if nothing was caught.

Buying and Selling Fish & Shellfish

You may not offer any recreationally-caught fish or Shellfish for sale or barter.

In order to buy, sell, or possess steelhead, sea-run cutthroat, or Dolly Varden/bull trout lawfully taken by a treaty Indian member: the fish must be accompanied by a written statement showing taker's name, address, tribal affiliation, and treaty fish identification card number, number of fish, date, and location where taken. This rule does not apply to treaty members nor to Game Fish purchased from a fish buyer licensed by the Department of Fish and Wildlife.

Gear Rules

You May Not:

- Snag or attempt to snag fish.
- Use a net, except a dip net to land legally-hooked fish, a forage fish dip net, or in Marine Areas 1-4, a forage fish cast net for sardine and anchovy only.
- Use drugs, explosives, or poison that may kill or injure fish and wildlife.
- Use any type of chemical irritant to harvest fish, or shellfish unless a special exception has been made by the Director.
- Fish with a rod not under your immediate control, or leave your gear unattended.
- Fish for Game Fish, salmon, sturgeon, shad, octopus, crab, or other shellfish with bow and arrow, spear, or spearfishing gear unless authorized by Special Rules.
- Use a gaff hook, except to land lingcod (in Marine Areas 1-3 and 4 West of Bonilla-Tatoosh line), halibut, tuna, or dogfish shark that will be retained.
- Use a crossbow to harvest fish or shellfish.

Fishing in Canadian Waters

In determining the location of the U.S./Canada border, U.S. (not Canadian) navigation charts apply to anglers fishing from vessels registered in the State of Washington.

Fish and Shellfish Caught in Canada

It is lawful to possess Canadian-origin fish or shellfish if you have a Canadian license and salmon conservation stamp (for salmon), except it is unlawful to possess Canadian-origin yelloweye or canary rockfish.

There are special rules for Canadian halibut and salmon. If you only fish in Canada, contact the Department of Fisheries and Oceans (DFO) or visit their website at www.dfo-mpo.gc.ca for updated Canadian regulations. If you fish for halibut in Washington, the daily limit is one halibut, and the possession limit is two halibut, regardless of where they are taken. No more than one daily limit of halibut may be possessed aboard the fishing vessel.

You may ***not*** land both a Canadian and a Washington limit of salmon on the same day (one or the other, but not both).

It is unlawful to possess in marine waters, or deliver into Washington, any fresh salmon taken for personal use from Canadian waters, unless such salmon meet current regulations for the waters of the applicable Washington Catch Record Card area. However, anglers aboard a vessel may deliver Canadian-origin salmon into Washington that are lawfully taken in Canada, regardless of whether the salmon meet the current regulations for the area where delivered, provided anglers meet trip notification requirements. See https://wdfw.wa.gov/licenses/fishing/canadian-trip-reporting.

Anglers are subject to WDFW Enforcement and dockside sampling inspection when landing Canadian catch in Washington waters.

*See pages 13-15 for Freshwater-specific rules and page 98 for Marine Area-specific rules.

Salmon, Trout, and Steelhead Handling Rules

FRESHWATER: "It is unlawful to totally remove salmon, steelhead, or Dolly Varden/bull trout from the water if it is unlawful to retain those fish, or if the angler subsequently releases the salmon, steelhead, Dolly Varden/bull trout."
EXCEPTIONS:

- The Columbia River between the Buoy 10 line and the Rocky Point/Tongue Point line
- The Columbia River from the Rocky Point/Tongue Point line upstream to Hwy. 730 OR/WA border the rules apply only when fishing from vessels less than 30 feet in length during Feb. 15-June 15.

MARINE AREAS 5 through 13: "It is unlawful to bring wild salmon or a species of salmon aboard a vessel if it is unlawful to retain that salmon" ("aboard" means inside the gunwale of a vessel).
MARINE AREA 2-2: "It is unlawful to totally remove salmon from the water if it is illegal to retain those fish, except anglers fishing from boats 30 feet or longer as listed on either their state or Coast Guard registration, are exempt."

How to Release Fish

When you need to release a fish, there are some special precautions you can take to give it the best chance of surviving:

- Minimize handling by leaving the fish in the water.
- Do not net your fish – but if you must, use a soft, knotless net or rubber mesh net. Knotless nets are now required in fly-fishing only areas and freshwater areas with selective gear rules.
- Use a hook remover (dehooker) when hooks are imbedded in the mouth or jaw.
- If a fish has swallowed the hook, cut the leader.
- Keep fingers away from the eyes and gills of the fish.

Selective Fishing

Selective fisheries for hatchery-produced fish and catch-and-release fisheries are increasingly important to providing recreational fishing opportunities in Washington. To ensure these fisheries are successful, it is absolutely essential that participating anglers comply with all regulations and take great care in releasing unmarked fish to ensure the greatest chance for survival.

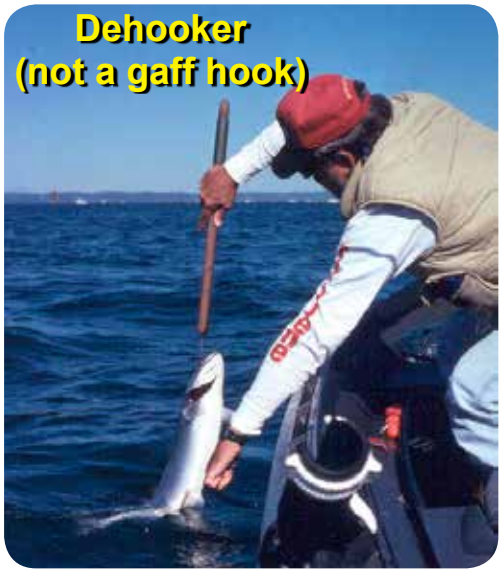

Photo shows the proper technique of releasing a fish with a dehooker without bringing the fish aboard the vessel.

License Information

Who Needs a Fishing License?

Adult Anglers: If 15 years or older, you are required to have a fishing license, catch record cards (CRC) and any endorsements needed to fish for specific species and specific areas. See license information below to determine what documents you need. Federal and state law requires persons 15 or older to give their Social Security Number in order to obtain a license (Federal Law US Code: Title 42, Section 666, Paragraph 13, Section A; and RCW 77.32.014).

You DO NOT need a license if you are fishing for common carp, crawfish, bullfrogs, smelt (in freshwater), or to collect relic shells.

Youth Anglers: Youth 14 years and younger DO NOT need a fishing license, however CRCs are required for specific species. See page 8 for more detail on CRCs. WDFW strongly supports and promotes youth fishing. Youth must actively participate and be able to demonstrate the ability to handle the gear by themselves. They must follow all the rules and restrictions for that species and/or body of water and are allowed the same daily limit as an adult. Adults may assist youth but are not required to have a license if they will not be fishing/harvesting themselves. Youth must be present and take part in the entire process.

Are You a Resident or Non-Resident?

To qualify as a Washington state resident, you must meet certain criteria per WAC 220-220-050.

- Have a valid Washington state driver's license or identification card; **and**
- Have maintained a permanent place of abode within the state for at least 90 days preceding the license purchase; **and**
- Are not licensed to hunt or fish as a resident in another state or country **or**
- Have military identification with a copy of orders showing Washington as your current duty station

Do You Qualify for Reduced Fees or Assistance With Fishing?

You may qualify for reduced fees if you are a:

- Resident or non-resident veteran with a service-connected disability of 30% or more
- Resident or non-resident veteran 65 years or older with any service-connected disability
- Resident who permanently uses a wheelchair
- Resident who is blind or visually impaired
- Resident with a developmental disability

You may qualify for assistance with fishing and be issued a designated harvester card. To determine if you qualify, visit https://wdfw.wa.gov/accessibility/eligibility-requirements-disability-status or call (360) 902-2464.

To receive reduced fees or assistance, an application must be completed by a licensed MD, ARNP or PA and then processed by WDFW. Applications and more information can be found at https://wdfw.wa.gov/accessibility or call (360) 902-2464.

Fish Washington License: Included in the license is an Annual Combination License – freshwater, saltwater, shellfish harvest (including razor clams) and seaweed. Also, 2 endorsements Two-Pole and Puget Sound Dungeness Crab. Your catch record cards for Puget Sound Dungeness crab, salmon, steelhead, and sturgeon are also included. To fish for Halibut, add the Catch Record Card + Halibut for an additional $5.50.

Short-term licenses are NOT valid for game fish (see page 15) for the 8-day period beginning the 4th Saturday in April (April 25-May 2, 2020) unless you are active-duty resident military personnel. These licenses must be used on consecutive days when purchasing a two or three-day license. The license does not include a Vehicle Access Pass.

Endorsements

Two-Pole Endorsement: All anglers 15 years and older who want to fish with two poles must have this endorsement. This endorsement can be added to any annual or short-term license for a fee, excluding the shellfish/seaweed or razor clam license. This endorsement allows anglers to use two fishing poles on most freshwater lakes, ponds, a few sections of certain rivers, and a few marine areas. Look for this icon next to the lake listing where two poles cannot be used. This endorsement is not offered to youth anglers. This endorsement is not required on Free Fishing Weekend.

Puget Sound Dungeness Crab Endorsement: All harvesters are required to have this endorsement to harvest Puget Sound Dungeness crab. This endorsement can be added to an annual or short-term combination or shellfish/seaweed license. With the endorsement you will be issued, a complimentary Puget Sound Crab Catch Record Card (CRC) for the summer and winter seasons. The cards must be picked-up at different times of the year for the different seasons. The endorsement and CRC are required to be on your person when fishing for Puget Sound Dungeness crab. There is no fee for youth anglers, but the endorsement and CRC are still required. This endorsement and CRC are required on Free Fishing Weekend, but issued at no cost. The CRCs have an administrative fee associated with them if your catch is not reported by the deadline. Reference the bottom of your CRC for more reporting information.

License Information

Catch Record Cards

Catch Record Card (CRC): You are required to have a catch record card (CRC) to record how many salmon, steelhead, or sturgeon you have harvested. You must have the CRC on your person while fishing. There is no fee for those 14 years old and younger, but they are required to have a CRC. This item is required during Free Fishing Weekend. The CRC harvest data must be returned to WDFW by April 30 of each year. Reference the bottom of your CRC for more reporting information. See page 8 for more details on CRC.

Catch Record Card + Halibut: This card is the same as the catch record card (CRC), but includes halibut. It is issued for a fee when added to an annual Combination or Saltwater fishing license. This CRC is only required if you are fishing for halibut. It is issued at no cost with short-term licenses. It is required on Free Fishing Weekend, and will still have a fee associated with it.

One-day Charter Stamps and Temporary Catch Record Cards: Licensed charters and guides offer fishing services for a fee and can issue a 1-day combination license and catch record card.

Key Fishing Dates

Free Fishing Weekend: is on June 6-7, 2020. Free Fishing Weekend is open to everyone, including residents and non-residents. On these days, fishing licenses, endorsements and parking passes are not required. Catch record cards (CRC) for salmon, steelhead, sturgeon and Puget Sound Dungeness crab ARE required and will be issued at no cost. However, if Halibut fishing is open during Free Fishing Weekend, the CRC + Halibut will still have a cost of $5.50. All other rules still apply, including seasons, area, lure or bait restrictions, size and catch limits. Each year, the Free Fishing Weekend will be the first weekend in June after the first Monday in June.

Lowland Lake Opener: starts April 25, 2020. Temporary Combination licenses cannot be used until after May 2, 2020 for game fish.

Trout Derby: from April 27 – October 31, 2019. Catch a tagged trout, win a prize. For rules, regulations and more information visit https://fishhunt.dfw.wa.gov/home/fishingderby.

License Fees

Parking on State Recreation Lands and Water Access Sites

Anyone who parks on Washington state recreation lands must use either the WDFW Vehicle Access Pass or the Discover Pass.

WDFW Vehicle Access Pass: This access pass is valid for WDFW land only. Most annual hunting, fishing and trapping licenses include a complimentary Vehicle Access Pass, which allows you to park at WDFW wildlife areas, boat launches and other water access sites. If your annual license does not come with a complimentary Vehicle Access Pass, or you would like to access WDFW land without purchasing a license, you must purchase a Discover Pass.

Discover Pass: This pass is valid for Washington State Parks, Washington Department of Natural Resources (DNR) and WDFW land. To park at recreational properties owned or managed by State Parks, or DNR you will need a Discover Pass. This is the only parking pass available for State Parks and DNR lands. However, if parking on WDFW land or using WDFW water access sites, either a Vehicle Access Pass or Discover Pass may be used. For more information on the Discover Pass, visit: https://www.discoverpass.wa.gov.

Fishing Contests

An adult fishing contest exists when 6 or more licensed anglers (15 years old and above) fish competitively for Game Fish. A fishing contest permit is required. A youth (14 years or under) fishing event only needs approval from regional office.

For information, or to request an application for a permit to conduct a fishing contest, contact the WDFW Fish Program at (360) 902-2700 or visit us on the web at https://wdfw.wa.gov/fishing/contests/rules. The cost of the permit is $94 ($70 non-refundable application fee plus $24 permit fee).

Catch Record Cards

The Catch Record Card is an important management tool for estimating the recreational catch of sturgeon, steelhead, salmon, halibut, and Puget Sound Dungeness crab. A catch record card must be in your possession to fish for these species. **Washington Administrative Code (WAC 220-56-175, WAC 220-69-236) requires all kept sturgeon, steelhead, salmon, halibut, and Puget Sound Dungeness crab to be recorded on your Catch Record Card, and requires all anglers to return their fish Catch Record Card by April 30, or for Dungeness crab by the date indicated on the card, even if nothing is caught or you did not fish.** Please use the instruction sheet issued with your card. Please return Catch Record Cards to: **WDFW CRC UNIT, PO BOX 43142, Olympia WA 98504-3142**. Use examples below to help complete your card correctly. **DO NOT RECORD RELEASED CATCH.** For Catch Record Card Information call (360) 902-2707.

Catch Record Cards for the winter period which begins the day after Labor Day are available on August 15. All Puget Sound Dungeness crab kept are required to be recorded on your Catch Record Card immediately after capture and before fishing again. Record catch information in ink. Be sure to make a check mark for each crab kept. The check mark is used by field enforcement officers to ensure each crab kept is immediately recorded. At the end of the fishing trip, or prior to moving to a new marine area, enter the total number of check marks in the **CRAB KEPT PER DAY** column. The number should equal the number of checkmarks on that line.

A $10.00 penalty will be added to the cost of your next Puget Sound crab endorsement if you fail to either return your cards by mail or report your catch information on the Internet (https://fishhunt.dfw.wa.gov) by the deadlines printed on the card.

REMINDER!

Return your Catch Record Cards by the date printed on the card "With or Without Catch"

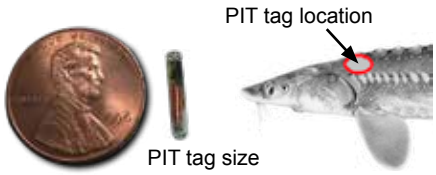
Other General Information

Sportfishing Rule Development

For information on upcoming sportfishing rule development, please visit our website at https://wdfw.wa.gov. The website will have information on the schedule, how you can participate, and the types of rule changes we will be considering. In addition, you can sign up to receive fishing rule changes and regulatory focused news releases at https://wdfw.wa.gov/about/lists.

Fish Tagging Notice

Researchers throughout the state have released fish including sturgeon, with PIT tags (small glass-encased microchips) injected into the muscle just behind the top of the head. The tag doesn't need to be returned, but check for the presence of a tag if the fish is to be consumed.



Several state and federal agencies (including WDFW), universities and Indian tribes also have released salmon, steelhead, sea-run cutthroat trout, and various marine fish species with small acoustic tags in their body cavities. These tags transmit signals that are picked up by special receivers, allowing fishery managers to track the fish. Anglers who find a tag while cleaning their catch should call (360) 902-2700 to report the tag number, species of fish, date and location of their catch.

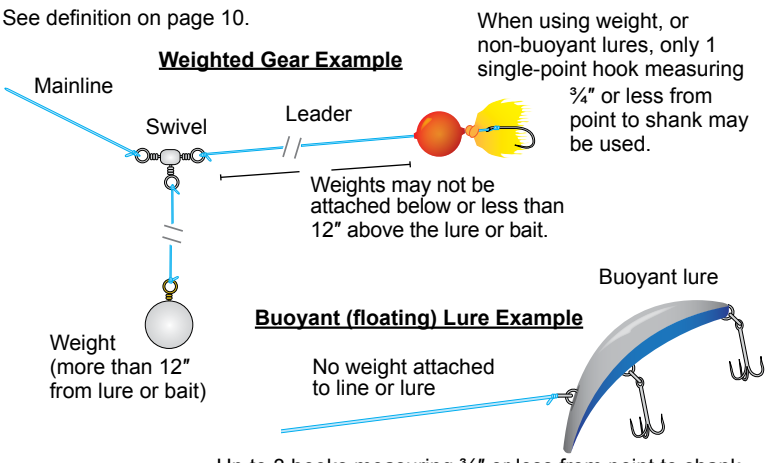
Special Use Permit

Anglers with "WDFW Disability Status" (see page 6) may apply for a "Special Use Permit" to accommodate their fishing activities. Special Use Permits are customized on a case by case basis to the individual's particular need. For more information, go to: https://wdfw.wa.gov/accessibility

Anti-Snagging Rule Examples

See definition on page 10.



Prohibited Aquatic Species

It is illegal to transport, introduce, or use prohibited aquatic animal and plant species, unless specifically authorized. WDFW encourages citizens to be vigilant in preventing the introduction or spread of prohibited and other non-native species. To report sightings and learn more about what you can do, please call toll free 1-888-WDFW-AIS. For more information on Aquatic Invasive Species, go to https://wdfw.wa.gov/species-habitats/invasive.

Co-Management

Washington's natural resources are managed cooperatively by the state of Washington and Indian tribes, whose rights were established in treaties signed with the federal government in the 1850s. In those treaties – considered the "supreme law of the land" under the U.S. Constitution – the tribes reserved rights to hunt, fish and gather shellfish and plants in traditional harvest areas.

In Washington, there are 29 federally recognized Indian tribes. Each has hunting and fishing rights within their reservations. Of these tribes, 21 also possess off-reservation hunting and fishing rights. Two tribes in Oregon and one in Idaho also have treaty-reserved rights to hunt and fish in the state.

These tribes and the state consult through a variety of co-management forums to develop joint natural resource management agreements through a shared commitment to meet one another's objectives. The long-term health of natural resources depends on the tribes and state working cooperatively to achieve common goals.

For more information on the tribes, visit the Governor's Office of Indian Affairs at https://www.goia.wa.gov.

License Suspensions and Property Forfeitures

Washington State's Fish and Wildlife Enforcement Code (Revised Code of Washington Chapter 77.15) requires the **mandatory** suspension of a person's fishing privileges, for up to five years, if a person is convicted of one of the following violations:

- assaulting a Fish and Wildlife Enforcement Officer, or an employee or agent of the Department performing official duties
- first degree waste of fish and wildlife
- harvesting endangered fish or wildlife
- unlawfully purchasing or using a license

In addition, repeat offenders (any person with three convictions for any kind of violation within ten years) receive a mandatory two-year suspension of all fishing and hunting privileges. The law treats an uncontested notice of infraction, a finding of "committed" on an infraction, or a guilty plea as a conviction that will count toward a potential suspension. You will permanently lose your fishing and hunting privileges if you hunt or fish on a suspended license or face a lifetime or longer term suspension if a violation demonstrates a willful or wanton disregard for the conservation of fish or wildlife. Furthermore, property that is used to violate any fishing and hunting regulations, or that is held with the intention of committing a violation, may be seized for evidence and may ultimately be forfeited to the state.

Statewide Freshwater Rules

Using Freshwater Rules

1 Read:

The Statewide Freshwater Rules and Statewide Freshwater Species Rules (pages 14-15). Determine seasons and general rules applying to the species for which you intend to fish.

2 Check Special Rules for your location:

Special Rules (pages 17-94), list areas where the Statewide Rules have been modified. These are divided into multiple areas: Puget Sound and Coastal Rivers, Columbia Basin Rivers, Westside and Eastside lakes. **RIVERS** lists rivers, streams, and beaver ponds. **LAKES** lists lakes, ponds, and reservoirs. For the purposes of this pamphlet, the Columbia and Snake are rivers (not reservoirs), and any Special Rules that apply are listed in the Columbia Basin section.

If a freshwater area is not listed in Special Rules, follow the Statewide Freshwater Rules.

3 Check for Emergency Rules:

Which can be found by calling the WDFW Fishing Hotline at (360) 902-2500, by contacting statewide customer service at (360) 902-2700, or by visiting the WDFW website at https://wdfw.wa.gov.

Statewide Freshwater Rules

The following Statewide Freshwater Rules and seasons apply (pages 14-15) unless listed otherwise in the Special Rules (pages 17-94).

Areas/Seasons

Areas listed within Special Rules (pages 17-94), show **ALL** game fish and salmon fishing opportunities for the specific area listed.

All freshwater areas are **CLOSED** to the harvest of any fish not classified as a food fish or game fish (see definitions page 10) except for Northern pike.

Freshwater areas are open 24 hours per day when open.

All freshwater areas are **CLOSED** to fishing for salmon, Dolly Varden/bull trout, lamprey, and grass carp.

Fishing for common carp, shad, or forage fish is open only during open game fish or salmon seasons.

Lakes, ponds, and **reservoirs** are **OPEN** to fishing for game fish (except Dolly Varden/bull trout and grass carp) **year-round**.

Rivers, streams and **beaver ponds** are **OPEN** the Saturday before Memorial Day through October 31.
Beaver ponds located within or connected to streams listed as open to trout and other game fish follow the same rules as the stream.

Tackle

Hook and line angling only. Barbed or barbless hooks may be used, and a hook may be single-point, double, or treble, but not more than one line with up to three hooks per angler may be used.

Single-point barbless hooks are required in areas designated as "fly fishing only" or "selective gear rules."

All fishing gear must be kept in immediate control and may not be left unattended while fishing. Rodholders may be used, but the rod must be easily removed without delay; rod may be left in holder while playing the fish.

A club or dipnet may be used to assist landing a legal fish taken by legal gear. A gaff hook may not be used.

It is unlawful to possess a fish taken from freshwater that was not hooked inside the mouth or on the head. The head is defined as any portion forward of the rear margin of the gill plate.

Bait Rules

It is unlawful to chum, broadcast, feed, or distribute into freshwater any bait or other substance capable of attracting fish unless specifically authorized in Special Rules.

Where use of bait is prohibited, or where lures or flies are used voluntarily, game fish may be caught and released until the daily limit is retained.

It is unlawful to possess or use live aquatic animals as bait, except:

1. Live aquatic animals (other than fish) collected from the water being fished.
2. Live sand shrimp.
3. Live forage fish in the Columbia River (downstream of Rocky Point/Tongue Point).

Sturgeon

Green Sturgeon may not be retained.

White sturgeon open for catch-and-release fishing during open game fish or salmon seasons.

Catch-and-release fishing ONLY in the Columbia River from Bonneville Dam downstream, and from Priest Rapids Dam to Chief Joseph Dam, Snake River from Ice Harbor Dam upstream, coastal and Puget Sound waters including their tributaries.

Annual white sturgeon limit is 2 fish even if the angler holds both a Washington and Oregon license.

Anglers may continue to fish catch-and-release after retaining a daily limit.

After an annual limit has been retained, catch-and-release fishing is allowed only in waters of the Columbia River forming the Oregon/Washington boundary.

Catch Record Cards are required statewide.

Only one single-point barbless hook and bait is allowed when fishing for sturgeon. In the field, eggs must be retained with intact carcass of fish from which they came. **Night closure in effect for all sturgeon (except Chehalis River).** Any sturgeon not to be retained must be released immediately. Oversized sturgeon cannot be removed totally or in part from the water.

Tagged sturgeon: Do not remove tags from fish not of legal size or not to be retained, but record: tag number and color, date, location of catch, fish length, your name and address. If fish is retained, remove tag and send with above information to the address below.

Special Rules Instructions

The Special Rules (pages 17-94), list freshwater areas where the Statewide Rules have been modified.

Unless otherwise listed in the Special Rules, you must follow the Statewide Rules.

Areas listed within Special Rules, show **ALL** game fish and salmon fishing opportunities for the specific area listed.

Common regulation terms and definitions can be found on pages 10-11.

The terms **"trout", "all game fish",** and **"other game fish"** include the trout and game fish species on the definitions pages 10-11, except Dolly Varden/bull trout and grass carp.

When landlocked salmon rules apply, landlocked Atlantic, coho, and Chinook salmon are regulated as trout. See definition page 11.

County references after lakes or streams are noted to make it easier to locate the waters listed, or to differentiate between two places with the same name. They do not mean that the rules apply only to the portion of water in that county.

In Grant, Adams, Okanogan, and Douglas counties, you may fish up to the base of all man-made dams or other obstructions (in listed and unlisted areas), except Zosel Dam.

Lakes with this icon have a public boat ramp.

Lakes with this icon are excluded from the Two-Pole Endorsement.

Waters annotated with:
Barbless hooks required for Salmon/Steelhead, require the use of barbless hooks when fishing for salmon and steelhead.

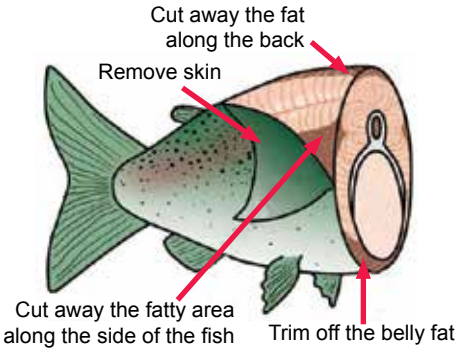
Eat Fish, Choose Wisely: Advice from Department of Health

Fish is good for you and part of a healthy diet. Understanding the health benefits of fish along with concerns over contamination such as mercury can be confusing. The key is to make smart choices. Choose fish that are low in mercury and other contaminants. Our advice is, "Eat fish, be smart, choose wisely!"

Tips to Reduce Contaminants



- Remove skin, organs, and fat before cooking
- Eat a variety of fish
- Eat younger and smaller fish (within legal limits)

Current Advisories

chart below is partial list of advisories

Although fish is a healthy part of our diet, there are 49 advisories in Washington State because of contaminants. We recommend you eat at least two fish meals per week and choose wisely. Eat a variety of fish that are low in contaminants. The chart below is not a complete list of all advisories in Washington. Most advisories in our state include fish that are good to eat, **including 24 healthy fish choices**!

Trout and Steelhead Identification

Steelhead
Steelhead are ocean-run rainbow trout that run in both summer and winter seasons, returning after one to three years at sea.

Bull Trout **Dolly Varden**
These fish are olive green to brown above and on the sides with no wormlike markings. There are cream or pink spots. The tail is slightly forked. Dolly Varden are typically smaller and are only found in a few headwater streams in Western Washington. Bull trout have a longer jaw and are found in Eastern and Western Washington and may also be encountered in marine waters.

Eastern Brook Trout
Dark green or blue with white belly which may become a vibrant orange as the fish nears spawning. Its upper body and dorsal fin have wormlike markings. Its sides have yellow and pink spots with blue rings. The lower fins are white-tipped and the tail is square.

Rainbow Trout
Body color is variable and may be silvery in lakes and reservoirs. Numerous closely grouped spots on dorsal fin and tail. The maxillary (upper jaw bone) does not usually extend beyond the back of the eye.

Brown Trout
This trout's back is brown or olive with large spots. Sides are light brown toyellowish with large dark spots surrounded by halos of blue-gray. The tail has few spots.

Westslope Cutthroat Trout
Body color is variable. Numerous closely grouped spots towards the dorsal fin and tail. The maxillary (upper jaw bone) usually extends beyond the back of the eye. Red or orange slash on the underside of the jaw.

Warmwater Species Identification

Largemouth Bass
This bass is dark green on the back and sides, with a dark, horizontal band along its sides. The belly is white. The large jaw, when closed, extends behind the eye.

Smallmouth Bass
This bass is dark olive to brown on the back with a white belly. The sides are bronze and have dark vertical bands. The small jaw does not extend behind the eyes.

Crappie
The body is silvery with dark spots. The fins have dark bands. White crappie may have vertical bars on the sides.

Yellow Perch
This perch has a greenish to yellow body, a white belly, and vertical dark crossbars on each side. There are no prominent teeth.

Salmon Identification

OCEAN PHASE

Chinook Salmon

Large black spots on back, dorsal fin, and both the upper and lower lobes of the tail. Black mouth with a black gum line and large prominent teeth. Silver pigment on the tail.

Coho Salmon

Black spots on back with spots only on the upper portion of the tail. White mouth with a white gum line, a dark tongue, and medium-sized teeth. Average size scales. Silver pigment on the tail.

Chum Salmon

No prominent spots on back or tail (small speckles may be present). White mouth with a white gum line, a dark tongue, and well developed teeth. Calico markings (vertical bars), but faint on bright fish. Silver pigment on the tail.

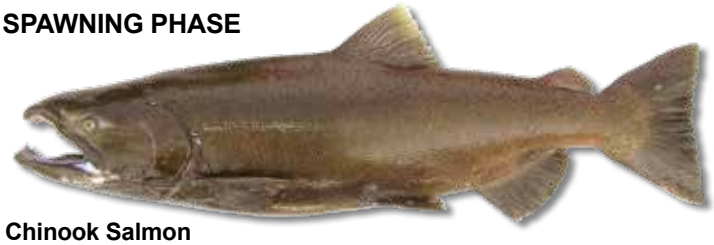
Pink Salmon

Generally large black spots on back and heavy oval shaped black blotches on the upper and lower lobes of the tail. White mouth with a black gum line and tongue. Very small scales. No silver pigment on the tail. Few if any teeth present.

Sockeye Salmon

No prominent spots on back or tail (small speckles may be present). White mouth with a white gum line, a dark tongue, and almost toothless. Average size scales. Prominent gold-colored eyes. No silver pigment on the tail. Small teeth.

SPAWNING PHASE



Chinook Salmon

Chinook salmon do not display the conspicuous morphological changes of pink, chum and sockeye salmon during the spawning stage. Typically Chinook turn from silvery bright ocean coloration to a darker bronze color. Large spots are found on the back and both lobes of the tail. Mouth is black with a black to grey gum line.

Coho Salmon

Mature coho salmon display a greenish-black head with a red to maroon colored body. Spots are found on the back and only upper lobe of the tail. The mouth is black with a white gum line. Typically male coho display brighter coloration and have a more pronounced elongated hooked snout.

Chum Salmon

Chum salmon display characteristic olive-green vertical markings on the sides of the body as they approach spawning. There are no spots on the back or tail. Male chum salmon develop a more elongated snout with large canine-like teeth and also have reddish-purple vertical markings in addition to the olive-green markings.

Pink Salmon

The majority of pink salmon return on odd-numbered years. Pink salmon have large oblong spots on the back and both lobes of the tail. Pink salmon, like most other salmon transform from silvery bright ocean coloration to a more dull and darker color. Males develop a pronounced hump as they approach spawning.

Sockeye Salmon

Sockeye turn brick red to scarlet red along their body with a greenish head. Female coloration is often more dull colored. There are no distinct spots on the back or tail. Sockeye can be found spawning in both lakes, streams, and rivers, while other Pacific salmon spawn in streams and rivers.

Atlantic Salmon

Male Atlantic salmon

Female Atlantic salmon

Atlantic salmon have large black spots on the gill covers and back, and rarely any spots on the tail fin. Their scales are large, there is no red stripe along the lateral line, and they have 8-10 anal fin rays. Atlantic salmon may be taken from marine waters during any open salmon season, and from anadromous (not landlocked) freshwater during any open salmon or trout season. Anglers may not, however, continue to fish for Atlantic salmon after a daily limit of another species of salmon has been retained. In landlocked lakes, Atlantic salmon may be taken as part of the trout daily limit. Seasons and size limits in place for trout apply to Atlantic salmon in landlocked lakes. Opportunities to harvest Atlantic salmon beyond those listed in the pamphlet will be announced to the news media and carried on WDFW's recreational fishing hotline. Please report sightings to (360) 902-2700.

Chinook, Coho, and Pink Salmon Identification

Chinook

Jaw- dark mouth and black gums at the base of its large, sharp teeth. Immature Chinook are known as a "blackmouth."

Tail- both the upper and lower lobes of the tail are covered with spots and silver is prominent.

Coho

Jaw- mouth is white and the gum line is almost white, but the tongue may be black. The medium-sized teeth are sharp.

Tail- has just a few scattered spots, usually on the upper lobe, with silver streaks. Base of tail is wide.

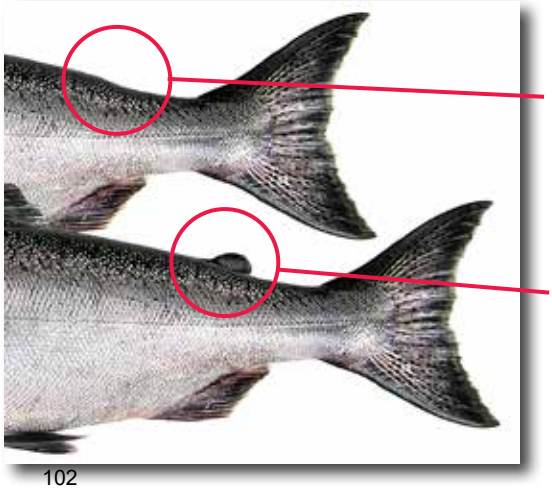
Pink

Jaw- mouth of a pink is white, but the gums and tongue are black, as they are in a Chinook. It does not have "teeth" on its tongue.

Tail- is covered with large oval spots. It does not have silver on the tail. The scales are very small compared to other salmon.

Wild/Hatchery Identification

In order to provide salmon and steelhead fishing opportunities, WDFW and the Tribes have marked salmon and steelhead by clipping the adipose fin (a small fatty fin directly behind the dorsal fin). In areas designated "release wild <insert fish name>", fin-clipped salmon and steelhead are the only fish that may be retained. The picture to the right shows a wild salmon and a fin-clipped or hatchery salmon. Please be careful in releasing wild fish– they are your fishing future! For tips on the best way to release fish, please see page 5. In Marine Areas 5-13, it is illegal to bring a wild salmon or a species of salmon aboard a vessel if it is unlawful to retain those salmon. "Aboard a vessel" is defined as inside the gunwale. In Marine Area 2-2, it is unlawful to totally remove salmon from the water if it is illegal to retain those fish, except anglers fishing from boats 30' or longer are exempt. Learn more by visiting:
https://wdfw.wa.gov/fishing/management/hatcheries/mass-marking



Hatchery Salmon
Adipose fin has been clipped – leaving a healed scar in its place.

Wild Salmon
Intact adipose fin.

Marine Area Rules

1 Season and Daily Hours:

During an open season, marine waters are open 24 hours per day, except as noted for night closures.

2 Quota Management:

Salmon, halibut, and some shellfish are managed by quotas in many marine areas. These fisheries close when the quotas have been taken. Closures will be announced to local news media and will be included in the Fishing Hotline and Shellfish Rule Change Hotline messages.

NOTE: Emergency rules may occur throughout the year and will supersede the rules contained in this pamphlet. Changes can be found by calling the WDFW Fishing Hotline (360) 902-2500 or Shellfish Rule Change Hotline (866) 880-5431, contacting statewide customer service (360) 902-2700, or by visiting the WDFW website https://wdfw.wa.gov.

Rules listed below are General Rules. Specific Area Rules are listed by area (pages 100-123).

Species Rules

Hatchery **STEELHEAD** may be caught and released until the daily limit is retained. If a fish has swallowed the hook or is hooked in the gill, eye, or tongue, it should be kept if legal to do so. Wild steelhead must be released.

SALMON - Single-point barbless hooks and a hand-held rod and line must be used. In Areas 5-13, it is illegal to bring a wild salmon or a species of salmon aboard a vessel if it is unlawful to retain those salmon. "Aboard a vessel" is defined as inside the gunwale. Also see special Handling Rule for Area 2-2 east of the buoy 13 line.

WHITE STURGEON - Only one single-point barbless hook and bait is allowed when fishing for sturgeon. Catch-and-release open year-round. Green sturgeon may not be retained.

HALIBUT - Hook and line angling and spearfishing only. A hand-held line is permitted. Only one line with up to two hooks may be used. halibut may be shot or harpooned while landing. May not be landed in a port closed to halibut fishing except halibut lawfully caught in Canada; angler must have Canadian license. See page 4, *Fish & Shellfish caught in Canada.*

BOTTOMFISH, TUNA, AND MACKEREL - Hook and line angling, spearfishing, and bow and arrow fishing only. May not retain, possess, or land bottomfish from Oregon that do not comply with the regulations for the area where the fish are landed. See bottomfish definition page 10.

ROCKFISH - You may not land yelloweye rockfish into any port in Washington. Unlawful to fish for, retain, or possess rockfish in Areas 6-13.

FORAGE FISH - Forage fish jig or forage fish dip net only except anchovy and sardine may be taken by a cast net in Areas 1-4. Only one net may be used at a time. Dip net gear must be held by the rigid handle at all times and may not be used from a vessel while under power. Cast net gear must be in immediate control at all times with retrieval cord in hand. Anglers with the reduced-fee license or a Designated Harvester Card may use a forage fish dip net with a hand-operated gate. Jig gear may have up to three treble hooks or nine single-point hooks, not to exceed ⅜" between point and shank. While fishing in Areas 5-11 &13, a second line using forage fish jig gear may be used to fish for forage fish.

You may use forage fish jig gear in Columbia River waters from the Buoy 10 line to the Rocky Point/Tongue Point line.

Species Rules

UNCLASSIFIED MARINE FISH - CLOSED

OTHER FOOD FISH - These are species which occur in our waters irregularly, usually in coastal areas and include opah, swordfish, striped marlin, dolphinfish, barracuda, white sea bass, bonito, and pomfret. Daily limit is 2 of each species.

SHARK CLOSURE - CLOSED to fishing for, retention, or possession of sixgill, sevengill, and thresher sharks. sixgill shark may not be removed from the water.

STEELHEAD - Two daily limits of hatchery steelhead.

STURGEON - Catch-and-release only.

BOTTOMFISH - Two daily limits in any form.

HALIBUT - Two daily limits in any form, except only one limit while aboard the fishing vessel. Annual limit is 4.
For halibut caught in Canadian waters, contact Department of Fisheries and Oceans Canada (DFO) or visit their website at http://www.dfo-mpo.gc.ca/fisheries-peches/recreational-recreative-eng.html for updated Canadian regulations.

TUNA - Albacore, and mackerel **-** No possession limit or daily limit. Yellowfin, skipjack, and Northern bluefin - No possession limit, daily limit 2 each.

FORAGE FISH (herring, anchovies, sardines, sand lance, and smelt) **-** Two daily limits in fresh form. Additional forage fish may be possessed in frozen or processed form. **CLOSED to fishing for Columbia River smelt (eulachon)**. See description on next page.

Tackle/Gear Rules

ALL FISHING GEAR - Must be kept in immediate control, and gear may not be left unattended while fishing.

HOOK AND LINE ANGLING - Unless noted differently, only one line with up to 2 hooks is allowed.

BARBLESS HOOKS - are required for **all species** in Marine Areas 5-13, except forage fish jig gear. When fishing for **salmon** in Areas 1-13, single-point barbless hooks must be used.

DESCENDING DEVICE - A device used for the rapid descent or recompression of fish. A descending device must be onboard vessels and rigged for immediate use when fishing for or possessing halibut or bottomfish. See https://wdfw.wa.gov/species-habitats/at-risk/species-recovery/rockfish for more information.

A gaff may only be used to land a legally hooked lingcod (in Marine Areas 1-3 and 4 West of Bonilla-Tatoosh line), halibut, tuna, or dogfish shark that will be retained. Halibut may be shot or harpooned while landing.

PROTECT WASHINGTON'S ROCKFISH

- Rockfish are a diverse and important group of marine fish in our waters
- A number of species are in low abundance in the Puget Sound and the Washington coast
- Help conserve Washington's rockfish by following these guidelines
  - Accurately identify and report all caught and released rockfish
  - Protect sensitive species by avoiding them
  - Don't leave "floaters"; use a descending device to quickly release rockfish back to the depth of capture
- Rockfish released with a descending device have a significantly improved chance of surviving
- Visit: wdfw.wa.gov/species-habitats/at-risk/species-recovery/rockfish for more information

Derelict Fishing Gear

Report lost or abandoned commercial nets or pots

There are no penalties associated with reporting lost commercial fishing gear.

The Derelict Fishing Gear Removal Project is a no-fault program. The goals are simply to remove lost and abandoned commercial gear, to help restore Puget Sound, to improve public safety, and to assist species recovery.

Nets are dangerous! Never attempt to remove them. Divers, stay a safe distance away.

Still Fishing After All These Years
Lost and abandoned commercial fishing gear continues to fish, impacting marine animals and destroying their habitat, entangling divers, and damaging propellers and rudders of boats.

What's being done?
Federal, state, tribal, and local governments, NGOs, and grassroots organizations and individuals are collaborating to protect and restore Washington marine resources by locating and removing harmful commercial derelict fishing gear.

How can you help?
Record as much information as you can when you find commercial derelict gear, including:

- Date of sighting
- Type of gear
- Approximate water depth
- General location
- Latitude (example 48.34333)
- Longitude (example -123.00333)

Shellfish/Seaweed Rules

Note: **For current clam, oyster, and mussel beach seasons check https://wdfw.wa.gov/places-to-go/shellfish-beaches,** the Shellfish Emergency Rule Change Hotline (866) 880-5431, or contact the WDFW customer service desk (360) 902-2700 to verify seasons.
RAZOR CLAM seasons occur only after clam samples have been tested by Washington Department of Health (DOH) and are found to be safe for human consumption. See page 128.

3 Steps to Safe and Legal Shellfish Harvest - It's your responsibility!

1 . . Know the Rules (You could get a ticket)

Is the harvesting season open? Read the rules for seasons, size, and bag limits. For beach seasons, check the website https://wdfw.wa.gov/places-to-go/shellfish-beaches or contact the WDFW customer service desk (360) 902-2700 to verify seasons. Beach-specific seasons are also displayed at www.doh.wa.gov/shellfishsafety. Any emergency rule changes are listed on the WDFW website or call the toll-free WDFW Emergency Rule Change Hotline (866) 880-5431.

2 . . . Pollution Closures (You could get sick)

Does the beach meet standards for healthy eating? Some closures and advisories are shown on page 127. For more detailed information and current updates visit the Washington Department of Health website at www.doh.wa.gov/shellfishsafety, call (360) 236-3330 or the local health department. County health department phone numbers are published in the government pages of local telephone directories.

3 . . . Marine Biotoxin Closures and *Vibrio* Warnings (You could get sick or die)

Is there an emergency closure due to Shellfish Poisoning (PSP/ASP/DSP) or *Vibrio* bacteria? Water quality conditions can change quickly. On the day you plan to harvest, check the DOH website at www.doh.wa.gov/shellfishsafety, call (360) 236-3330, or the Shellfish Safety toll-free Hotline at (800) 562-5632.

Two different state agencies are responsible for two different types of recreational shellfish harvest closures. The Washington Department of Fish and Wildlife (WDFW) is responsible for conservation closures or season adjustments. These closures are designed to protect and conserve intertidal shellfish populations. The Washington Department of Health (DOH) is responsible for human health-related closures in response to potentially life-threatening environmental conditions, which result from PSP/ASP/DSP, *Vibrio* bacteria or pollution, as described in the Shellfish Safety section on the next page. Permanent WDFW/DOH closures and periodic DOH harvest advisories are shown on page 127.

DOH SEASON	WDFW SEASON	HARVEST STATUS	REASON
Open	Open	SAFE & LEGAL	
Open	Closed	ILLEGAL	Conservation closure or season adjustment
Closed	Open	NOT SAFE	Potentially life-threatening environmental conditions
Closed	Closed	NOT SAFE & ILLEGAL	

Licenses

A Combination or a Shellfish/Seaweed License is required for all shellfish (except crawfish) and seaweed harvest. A catch record card, and endorsement is required to fish for Dungeness crab in Puget Sound. (See License Requirements, page 6).

Possession Limit

One daily limit in fresh form. Any additional shellfish in possession must be in a frozen or processed form that clearly distinguishes them from that day's limit.

Designated Harvesters

Persons with a disability must have a designated harvester companion card issued by WDFW if using another harvester to assist them with their catch. The person harvesting the catch on behalf of the licensee with a disability must be in possession of the designated harvester companion card while assisting the person with a disability. Both the harvester and the person with a disability must be licensed. The licensee is also required to be in the direct line of sight of the designated harvester who is harvesting shellfish for them. If this is not possible, the licensee is required to be within ¼ mile of the designated harvester who is harvesting shellfish for them.

Tideland Ownership

Most Puget Sound, Hood Canal, Grays Harbor, and Willapa Bay beaches are privately owned. Shellfish and Seaweed may not be taken from private beaches without the owner's or lessee's permission. Private tideland owners and lessees, and members of their immediate family (grandparents, parents, spouse, siblings, children, and grandchildren) are exempt from personal use daily limits when taking clams, oysters, and mussels harvested for their own personal use from their own tidelands. Daily limits apply for all other shellfish, all other people, and all other beaches. Everyone harvesting shellfish in excess of the daily limit from private beaches for presumed commercial purposes needs a shellfish certification from the Department of Health (see RCW 69.30.010(8)).

Octopus Protection Areas

For Octopus Protection Areas, see Marine Area maps (pages 110-122) for closures:
AREA 8-1: Deception Pass
AREA 10: Alki Beach Junk Yard, and Seacreast Park Coves 1, 2, and 3.
AREA 11: Three Tree Point, Redondo Beach, and Les Davis.
AREA 13: Days Island

Marine Preserves, Conservation & Areas

See Marine Area maps (pages 99-122) for closures (closures apply to all shellfish species).
AREA 7: San Juan Islands Marine Preserve.
AREA 9: Edmonds Public Fishing Pier, Brackett's Landing Shoreline Sanctuary, Keystone Conservation Area, and Admiralty Head Marine Preserve.
AREA 10: Elliott Bay Public Fishing Pier, Orchard Rocks Conservation Area, Carkeek Park, Golden Gardens, Discovery Park, Richey Viewpoint, Emma Schmitz Memorial, Lincoln Park, and Eagle Harbor
AREA 11: Des Moines Fishing Pier, Les Davis Fishing Pier, Colvos Passage Marine Preserve, City of Des Moines Park, and South 239th Street Park, and Saltwater State Park Marine Preserve
AREA 12: Sund Rock Conservation Area, Waketickeh Creek Conservation Area, and Octopus Hole Conservation Area.
AREA 13: Saltar's Point Conservation Area, Titlow Beach Marine Preserve, and Z's Reef Marine Preserve

Shellfish Safety Information

Eating contaminated shellfish or seaweed can cause serious illness or death. The only way to be safe is to "Know Before You Dig". Always check for current beach closures and advisories related to biotoxins, pollution, or other human health concerns the same day you plan to harvest: www.doh.wa.gov/shellfishsafety (clickable map), or call the Department of Health at (360) 236-3330 or the local county health department. For biotoxin information only, call the toll-free Biotoxin Hotline at 1-800-562-5632. In addition, some beaches may be posted with warning signs - look for signs as you access the beach.

ALWAYS CHECK BOTH THE CURRENT WDFW SEASON AND THE DOH HEALTH CLOSURE STATUS BEFORE HARVESTING ANY PUBLIC BEACH

Biotoxin Closures

Don't harvest in areas with marine biotoxins, also known as "Red Tide". You could get sick or die.

PARALYTIC SHELLFISH POISONING (PSP) & AMNESIC SHELLFISH POISONING (ASP) & DIARRHETIC SHELLFISH POISONING (DSP):

- Can make you sick or cause death
- Can't be destroyed by cooking or freezing
- Are produced by algae and do not always turn the water red
- Can remain in butter and varnish clams longer than in other shellfish species

Pollution Closures

Don't harvest in areas that are polluted. You could get sick.

Pollution can come from many sources like sewage drain pipes, failing septic systems, farm practices, boats, and pet waste. Some closures and advisories are listed on page 127. Visit www.doh.wa.gov/shellfishsafety for the current beach status.

Vibrio Warnings

Be aware of Vibrio Warnings. You could get sick.

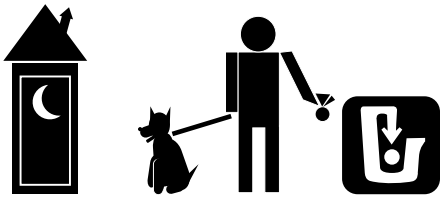
***VIBRIO* BACTERIA:**

- Cook all shellfish thoroughly to kill the bacteria and to avoid getting sick
- Highest risk from May-September, especially in Puget Sound and Hood Canal
- Are naturally occurring bacteria that can multiply rapidly in warm conditions

Help Keep Our Waters Safe and Clean

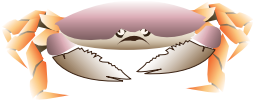
Human and pet waste can make people sick and cause harvest closures. Please do your part to protect our waterways and shellfish beaches:

- Use public toilets. Scoop, bag and trash human waste if no facilities are available.
- Scoop, bag, and trash your pet's waste.
- Pump, don't dump! Use pumpout stations to dispose of boat sewage. Visit https://pumpoutwashington.org.



Safe Handling Practices

- Water color does not indicate shellfish safety.
- Rinse your catch in salt (not fresh) water before leaving the beach, quickly cool your catch on ice or in a refrigerator, and cook as soon as possible.
- Wash all seaweed before eating.
- Cook shellfish thoroughly before eating.
- Cooking, rinsing, or freezing **DOES NOT** destroy all pollutants. Crab can also concentrate pollutants in their internal organs (crab butter).
- Clean crab before cooking. Eat only the meat.



Washington State Department of Health

Shellfish Are GOOD For You!

***Protein-rich *Low-fat *Essential minerals**

BUT. . . when gathering your own, remember the 3 C's of safe shellfish harvest:

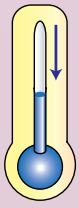
Check – Chill – Cook!

Check for:

- Health closures and advisories (biotoxin, pollution, Vibrio) www.doh.wa.gov/shellfishsafety
- Harvesting closures (seasons, limits) **https://wdfw.wa.gov/fishing/shellfishing-regulations**
- Signs on the beach: Follow posted warnings and closures, and respect private property

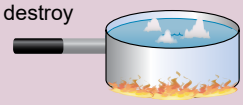
Chill shellfish – it's important!

- Harvest shellfish on the outgoing tide
- Put them on ice as soon as possible to prevent bacterial growth
- Keep them cold until they're ready to eat



Cook shellfish in summer

- Vibrio illnesses occur during summer months
- To kill Vibrio bacteria cook shellfish to 145° F for at least 15 seconds
- Cooking does not destroy biotoxins



Ask your doctor before eating raw shellfish if you have any concerns about allergies, are taking medications, or have a weakened immune system (such as cancer, liver disease, or HIV). Shellfish are great and healthy food. Avoid illness – follow the 3 C's.

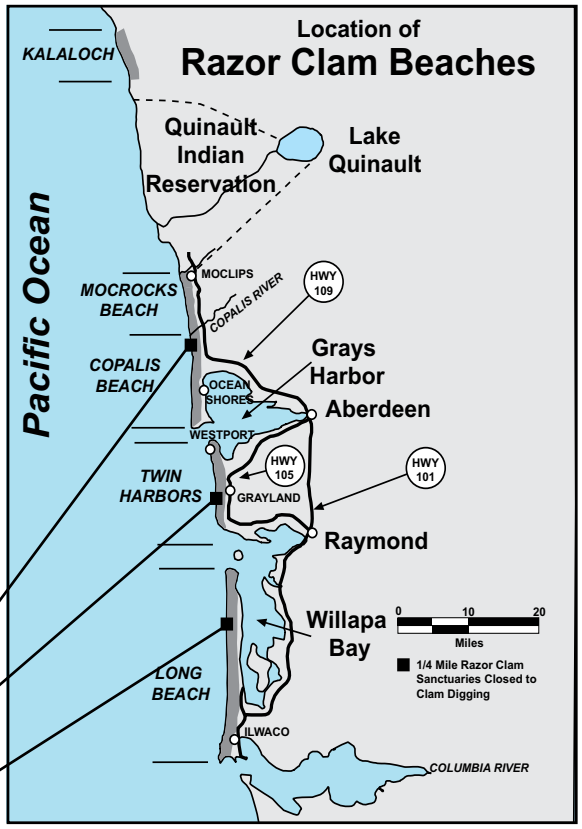
Razor Clam Rules

AREA	SPECIES	SEASON	ADDITIONAL RULES
RAZOR CLAMS *(Siliqua patula)* Grows to 6"; fragile, thin elongated shells are covered with shiny, tan lacquer-like skin coating the shell. Found only on Pacific coastal beaches. **Razor clam seasons occur only after clam samples have been tested for marine biotoxins by Washington Department of Health (DOH) and are found to be safe for human consumption.**			
COASTAL BEACHES	RAZOR CLAMS	TO BE ANNOUNCED	No min. size. Daily limit first 15 dug regardless of size or condition (broken clams count towards limit). Each limit must be in a separate container.

- May only be taken by hand, hand-operated shovel, or tube with a minimum outside diameter of 4" (4" x 3" if elliptical).
- All clams dug are part of digger's limit - you may not return any razor clams to the beach or water.
- It is illegal to drive any vehicle or to lead or ride a horse on razor clam beds (westerly of a line 150' waterward of the extreme upper limit of the hard sand area). Pressure from weight of vehicles and digging action of horses' hooves cause clam mortality.
- The person with a disability for whom razor clams are being dug must be in line of sight of the designated harvester or within ¼ mile of the digging site. Both the digger and the person with a disability must be licensed. The person with a disability must have a designated harvester companion card. The designated harvester must have the designated harvester companion card in their possession while assisting the person with a disability. (See page 7).



OCEAN RAZOR CLAM BEACH DESCRIPTIONS

Long Beach: Columbia River north jetty to Leadbetter Point (includes Seaview, Cranberry, Klipsan, Ocean Park, and Oysterville).

Twin Harbors: Northern shore of Willapa Bay (from Toke Point west, not including the beaches within the Shoalwater Bay Indian Reservation) to the Grays Harbor south jetty (includes North Cove, Grayland, and Westport).

Copalis: Grays Harbor north jetty to the Copalis River (includes Ocean Shores, Oyhut, Ocean City, and Copalis).

Mocrocks: Copalis River to the southern boundary of the Quinault Indian Nation (includes Iron Springs, Roosevelt, Pacific Beach, and Moclips).

Kalaloch: Olympic National Park South Beach Campground to Brown's Point (just south of Olympic National Park Beach Trail #3).

PERMANENT RAZOR CLAM RESERVE CLOSURES

(Areas marked with posts and signs)

Razor clam sanctuaries (Reserves) are ¼ mile sections of coastal ocean beaches located on three beach areas that are used to assist in the management of the razor clam resource. The three areas are marked with metal posts and are signed to designate a "no digging" area. The three areas are:

Copalis Beach - from a point 0.4 miles south of the Ocean City approach (2nd Ave.) and extending south for ¼ mile.

Twin Harbors Reserve - from the middle of the County Line Rd. approach south for ¼ mile.

Long Beach Reserve - beginning 2.7 miles north of the Oysterville approach and extending north for ¼ mile.

Pacific Razor Clam

Siliqua patula

Grows to 6"; fragile, thin elongated shells are covered with shiny, tan lacquer-like skin coating the shell. Found only on Pacific coastal beaches.

ABALONE CANNOT BE LEGALLY HARVESTED

STOP!
ILLEGAL ABALONE HARVEST

Pinto abalone are an endangered species in the State of Washington. Harvest of endangered species such as abalone could result in a felony conviction. The fishery for pinto (aka northern) abalone has been closed since 1994 in order to reverse population declines. Even with the closure, populations have continued to collapse. Between 1992 and 2017, monitored abalone populations have fallen by 97%. Efforts are underway to restore this important species and in order for restoration to succeed, we must protect all remaining wild abalone. A suite of partners has created a hatchery program to raise and outplant juvenile abalone, but this program relies on wild abalone as parents for hatchery production. Wild abalone, particularly those found in small groups, are critical for natural spawning and recovery. Abalone are sensitive to any physical disturbance. If you see one, please do not disturb it; all harvest is prohibited.

CRAYFISH (Crawfish)			
ALL OPEN WATERS	NATIVE SPECIES (SIGNAL CRAYFISH)	1st Mon. in May-Oct. 31	Min. size 3¼" from tip of rostrum (nose) to tip of tail. Daily limit 10 lbs in shell. All females with eggs or young attached must be immediately returned to the water unharmed. No Shellfish/Seaweed license is required. See gear rules on page 135.
	NONNATIVE SPECIES	1st Mon. in May-Oct. 31	Must be kept in a separate container. Must be dead before being removed from riparian area (immediate vicinity of water body). No daily limit, size, or sex restrictions. No Shellfish/Seaweed license is required. See gear rules page 135.

There is only one native crayfish species in Washington – the signal crayfish (*Pacifastacus leniusculus*). This species can be identified by its uniform brownish coloration, white or light coloration of the claw joint ,and the smooth surface of its carapace and claws compared to that of nonnative species. **Native crayfish are the only crayfish that may be removed from the vicinity of the waterbody alive**. If you cannot positively identify your catch as a nonnative species, the daily limit and other restrictions listed above for native crayfish apply.

No pronounced bumps or distinct dark tips on claws.

Claws can range in color from blue or green with red underneath.

How to humanely kill and preserve crayfish
There are two important steps to killing a crayfish quickly and humanely. The first is to chill them in ice or ice slurry for 20-30 minutes, and the second is to pierce their head with a knife.

Crab Rules

CRAB: When harvesting Dungeness Crab in *Puget Sound only*, a catch record card (CRC) and a crab endorsement are required. Any harvest after Labor Day must be recorded on a winter CRC. Refer to CRC rules on page 8. A $10.00 penalty will be added to the cost of your next Puget Sound crab endorsement if you fail to either return your cards by mail or report your catch information on the Internet (fishhunt.dfw.wa.gov) by the deadline printed on each card. Must release all softshell crab (underside of shell flexes with finger pressure - see below). Fishing instruments must not penetrate the shell. It is unlawful to possess crab in the field without retaining the back shell. May not retain any species of crab other than Dungeness, Red Rock, and Tanner. See rules below.

Dungeness, Red Rock, and Tanner Crab Daily Limits and Rules:

Puget Sound has a daily limit of 5 Dungeness crab, 6¼" minimum size, males only, and in hardshell condition.

Statewide Gear Rules - Crab, Shrimp and Crawfish

Caution: The requirements below are the minimum established by law. The addition of weights to traps is advised and currents in some locations may also require the use of additional buoys to prevent the equipment from being lost. Refer to the individual species listings (crab, page 132; shrimp, page 134; and crawfish, page 130) for seasons and other harvest rules. Not all shellfish gear sold in Washington meet the specifications shown on this page. Verify that your pot meets these requirements prior to use.

GENERAL GEAR RULES:

May be harvested by hand or dipnet. Hand operated instruments may not penetrate the shell.
One star trap, one ring net, one castable snare, or one pot is considered one unit of gear. The maximum number of units of gear that may be fished per person is:

Puget Sound: (Marine Area 4, east of the Bonilla-Tatoosh line, and in Marine Areas 5-13).
Shrimp: Two pots per person, and no more than 4 shrimp pots may be onboard or fished by any one boat at a time.
Crab: Two units of crab gear per person, and no limit on the number of units of crab gear per boat.

Coastal Waters: (Marine Areas 1-3 and in Marine Area 4, west of the Bonilla-Tatoosh line). Two units of crab and/or shrimp gear per person. Exception: Columbia River - three units of crab gear per person.

Freshwater: Crawfish: Five units of gear per person.

Every shellfish pot, ring net, or star trap left unattended in Washington waters must have its own buoy line and a separate buoy that is permanently and legibly marked with the owner's first name, last name, and permanent address (telephone number is voluntary). It is **ILLEGAL** to set or pull unattended shellfish gear with a buoy that does not have your name on it, and only one name and address may appear on each buoy. Any angler may assist the person whose name is on the buoy while he or she is pulling the pot. No fisher may set, or pull shellfish gear from a vessel, in Catch Record Card Areas 1-13, from one hour after official sunset to one hour before official sunrise. **All shellfish gear must be removed from the water on closed days.**

Buoys must be constructed of durable material (no bleach, antifreeze, detergent bottles, paint cans, etc.) and must be visible on the surface at all times except during extreme tidal conditions. Personal flags and staff, if attached to buoys, can be of any color. Buoy lines must be weighted sufficiently to prevent them from floating on the surface.

All crab, shrimp, and crawfish pots must be equipped with a biodegradable device (rot/escape cord) and shall include one or more of the following:
(1) securing the pot lid hook or tie down strap with a single loop of cord; or
(2) sewing a 3" by 5" escape panel in the upper half of pot closed with cord; or
(3) attaching the pot lid or one pot side (serving as a pot lid) with no more than three single loops of cord.

Cord used must be untreated 100% cotton or other natural fiber no larger than thread size 120 (⅛"). This cord, when attached as described above, must be able to rot away and allow crab, shrimp, crawfish and fish to escape freely if the pot is lost. A derelict crab pot without proper escape cord can attract and kill crabs for years after the pot has been lost.

CRAB GEAR:

The minimum mesh size for crab pots is 1½", and all pots must have two 4¼" minimum inside diameter escape rings in the upper half of the pot, except in the Columbia River where the minimum ring size is 4" inside diameter.

All parts of ring nets and star traps must lie flat on the sea bottom and may not restrict free movement of crab until lifted. Shellfish pots must be covered by water at all times while being fished.

Crab pots must not exceed 13 cubic feet.

All crab gear buoys must be half red and half white in color, and both colors need to be visible when fishing.

SHRIMP GEAR:

Pots must be constructed of either flexible or rigid mesh material (no liners allowed).

Entrance tunnels can be made of any size mesh material but must be located on the sides of the pot. The sum of the maximum tunnel widths must not exceed one-half the perimeter of the bottom of the pot.

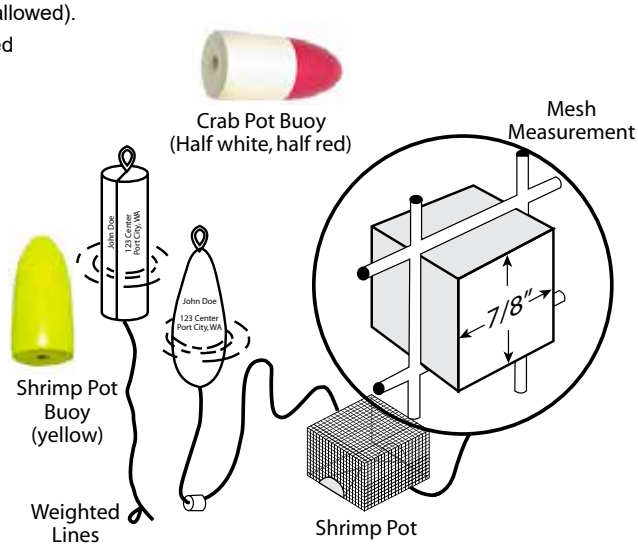
Shrimp pots must not exceed 10 feet in perimeter and 18" in height.

All shrimp pot buoys must be yellow in color.

SHRIMP POT MESH SIZE:

1" Minimum Mesh Size
A ⅞" square peg must be able to pass through each mesh opening – see diagram, except for flexible (web) mesh pots, where the opening must be a minimum of 1 ¾" stretch measure.
Puget Sound:
Required for all shrimp pots during the month of May.
Required in all areas open for spot shrimp after June 1st.
Pacific Ocean:
Year-round in waters seaward of 20 fathoms.

1/2" Minimum Mesh Size
A ⅜" square peg must be able to pass through each mesh opening, except for flexible (web) mesh pots, where the opening must be a minimum of 1⅛" stretch measure.
Puget Sound:
Allowed after June 1st in any area closed for spot shrimp, but open for coonstripe and pink shrimp.
Pacific Ocean:
Year-round in waters shoreward of 20 fathoms.



LOST GEAR:

Do not attempt to retrieve your lost shellfish gear without first getting permission from the WDFW Enforcement Program (360) 902-2936. Permission may be granted verbally or by a permit to retrieve your gear. Salvaging gear belonging to others requires a permit. To report lost shellfish gear, use the Online Reporting Tool https://wdfw.wa.gov/fishing/shellfishing-regulations/gear-rules/lost-gear or call WDFW at 1-855-542-3935. If we can recover your gear and it is properly identified, we will attempt to return it.
