U.S. Environmental Protection Agency Reviews Cleanup at Tonolli Corp. Superfund Site

The U.S. Environmental Protection Agency (EPA) is conducting its third Five-Year Review of the **Tonolli Corporation Superfund Site** located along Rte. 54 in Nesquehoning, Carbon County. This review seeks to confirm that the environmental cleanup conducted at the site, which included demolition and removal of structures; excavation and removal of contaminated soils, construction of an on-site landfill for contaminated soils and waste, and groundwater monitoring, continues to be protective of public health and the environment. EPA's last formal review of the site in 2008 concluded that the cleanup remedy continues to be protective. The 2008 review also recommended further evaluation of surface waters/sediment; continued groundwater monitoring, and implementation of institutional controls (restrictions on future use) to ensure long-term protectiveness. Since then, an evaluation of surface waters/sediment has been completed; groundwater monitoring continues, and work to implement institutional controls is progressing.

What is an EPA Five-Year Review?

EPA inspects Superfund sites every five years to ensure that cleanups conducted remain fully protective of human health and the environment. These regular reviews, which are required by federal law when contaminants remain at a site, include:

- Inspection of the site and cleanup technologies;
- Review of monitoring data, operating data, and maintenance records, and
- Determination if any new regulatory requirements have been established since EPA's original cleanup decision was finalized.

When will EPA's Five-Year Review Report be available?

The Five-Year Review report will be finalized and available online at <http://epa.gov/5yr> by June 2013. You may also access all previous Five-Year Review reports for this site at the webpage listed above.

For more information:

There are several ways to review information on this site. The Administrative Record (AR), which includes EPA decision documents used for selecting the cleanup remedy, is available for public review at www.epa.gov/arweb. You may also review the AR and other site information at the following locations:

Nesquehoning Borough
114 West Catawissa Street
Nesquehoning, PA 18240
Phone: (570) 669-9588

EPA Region 3 Public Reading Room
Attn: Paul Van Reed (3HS42)
1650 Arch Street, 6th floor
Philadelphia, PA 19103
Phone: (215) 814-3157 (Call to make an appointment)
