

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

MAR 11 2010

OFFICE OF
THE ADMINISTRATOR

The Honorable Joseph R. Biden, Jr.
President of the Senate
Washington, DC 20510

Dear Mr. President:

I am pleased to submit the *FY 2008 Superfund Five-Year Review Report to Congress*, in accordance with the requirements in Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended.

If you have any questions or comments regarding the report, please contact Mathy Stanislaus, Assistant Administrator, Office of Solid Waste and Emergency Response, at 202-566-0200 or your staff may contact Carolyn Levine in the Office of Congressional and Intergovernmental Relations at 202-564-1859.

Sincerely,

A handwritten signature in black ink, appearing to read "Lisa P. Jackson".

Lisa P. Jackson

Enclosure

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

MAK 1 1 2010

OFFICE OF THE
ADMINISTRATOR

The Honorable Nancy Pelosi
Speaker of the House of Representatives
Washington, DC 20515

Dear Madam Speaker:

I am pleased to submit the *FY 2008 Superfund Five-Year Review Report to Congress*, in accordance with the requirements in Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended.

If you have any questions or comments regarding the report, please contact Mathy Stanislaus, Assistant Administrator, Office of Solid Waste and Emergency Response, at 202-566-0200 or your staff may contact Carolyn Levine in the Office of Congressional and Intergovernmental Relations at 202-564-1859.

Sincerely,

A handwritten signature in black ink, appearing to read "Lisa P. Jackson", written over a horizontal line.

Lisa P. Jackson

Enclosure

**FY 2008 REPORT TO CONGRESS
SUPERFUND FIVE-YEAR REVIEWS**

PURPOSE:

The U.S. Environmental Protection Agency (EPA) is responsible for reviewing Superfund remedial actions at least every five years where hazardous substances, pollutants, or contaminants will remain on site above levels that allow for unlimited use and unrestricted exposure. EPA is also responsible for preparing a report to Congress on these reviews.

BACKGROUND:

Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, states:

“If the President selects a remedial action that results in any hazardous substances, pollutants, or contaminants remaining at the site, the President shall review such remedial action no less often than each 5 years after the initiation of such remedial action to assure that human health and the environment are being protected by the remedial action being implemented. In addition, if upon such review it is the judgment of the President that action is appropriate at such site in accordance with section 9604 or 9606 of the Title, the President shall take or require such action.”

CERCLA also requires that EPA report to Congress information regarding these sites for which the reviews are required. This report provides a list of sites, information about sites where additional work is required, and contacts for additional information.

FINDINGS:

The attached table presents a list of statutory, policy and discretionary¹ five-year reviews (note: no discretionary reviews were completed in FY 2008) for non-Federal sites and NPL Federal sites, including the following:

¹ Statutory reviews are required if both of the following conditions are true: 1) Upon completion of the remedial action, hazardous substances, pollutants, or contaminants will remain on site; and 2) The Record of Decision (ROD) for the site was signed on or after October 17, 1986 (the effective date of SARA) and the remedial action was selected under CERCLA §121. Policy reviews occur for the following types of actions: 1) a pre- or post-SARA remedial action that, upon completion, will not leave hazardous substances, pollutants, or contaminants on site above levels that allow for unlimited use and unrestricted exposure, but requires five years or more to complete; 2) a pre-SARA remedial action that leaves hazardous substances, pollutants, or contaminants on site above levels that allow for unlimited use and unrestricted exposures; or 3) a removal-only site on the NPL where a removal action leaves hazardous substances, pollutants, or contaminants on site above levels that allow for unlimited use and unrestricted exposure and where no remedial action has or will take place. Discretionary reviews are not required by the statute or as a matter of EPA policy but occur at the Region’s discretion to help ensure the protectiveness of the remedy.

- Reviews due in FY 2008, currently completed;
- Reviews due in prior or later fiscal years, currently completed;
- Reviews due in FY 2008, still pending; and
- Reviews due in prior fiscal years, still pending.

For non-Federal sites, a total of 196 sites required five-year reviews in FY 2008. All but two of the reviews due in FY 2008 are complete. EPA anticipates the remaining two reviews will be completed by September of 2010. Another 8 reviews due in other fiscal years also were completed, bringing the total number of non-Federal site, five-year reviews completed to 202.

For Federal sites, a total of 24 sites required five-year reviews in FY 2008. All reviews due in FY 2008 are complete. Another 7 reviews due in other fiscal years also were completed, bringing the total number of Federal site, five-year reviews completed to 31.

In all, the total number of five-year reviews completed for both non-Federal and Federal sites was 233. The reviews at 8 “not protective” sites and 29 “protectiveness deferred” sites (or portions of the sites) recommended additional work or additional study. For these sites, implementation of the recommendations in the five-year review reports is underway so that the site will ultimately become protective. The recommendations for each of these sites are tracked in the CERCLIS database, and semi-annually headquarters monitors the progress in implementing these recommendations to resolve protectiveness issues at all sites.

Copies of all five-year reviews, including those contained in this report, can be accessed publicly via the national Superfund web page (<http://cfpub.epa.gov/fiveyear/>). These reports contain detailed information regarding the effectiveness of the site remedy and assess whether human and/or ecological exposures are occurring. The information in these reports thus informs the protectiveness determinations that are ultimately selected and that are reported in the following table for each site.

For Federal sites, one review due in a prior fiscal year remains pending. The Federal agency responsible for producing this five-year review report is aware that this report is due and we are working with this agency to complete it. EPA expects that these reviews will be completed in the near future.

FY 2008 Superfund Five-Year Review Report to Congress

¹ For all sites that require a five-year review, a separate protectiveness determination is generally made for each portion (operable unit) of the site. The statement that is considered "least protective" is used as the general determination for the review in this report. For example, if one operable unit is protective but another operable unit has protectiveness deferred, the determination for the entire review will be protectiveness deferred.

Protective - The remedy is protective of human health and the environment.

Short-Term Protective - The remedy is protective of human health and the environment in the short-term. This statement is generally used when the remedy is protective but requires further actions or institutional controls to remain protective in the long-term.

Will Be Protective - The remedy is expected to be protective of human health and the environment upon completion, and in the interim, exposure pathways that could result in unacceptable risks are being controlled. This statement is generally used for remedies that are under construction.

Protectiveness Deferred - A protectiveness determination of the remedy cannot be made until further information is obtained. Generally, reviews that include this determination identify both the actions and timeframe necessary to obtain the information so a protectiveness determination can be made through an addendum to the five-year review report.

Not Protective - The remedy is not protective of human health and/or the environment. For example, a new exposure pathway may be identified or a remedy may not be able to meet a new cleanup level. Generally, reviews that include this determination identify actions that need to be taken to ensure protectiveness.
