**MEMORANDUM**

**SUBJECT:** Transmittal of Final Guidance, "Close Out Procedures for National Priorities List Sites"

**FROM:** Stephen D. Luftig, Director /s/ *Larry Reed* for  
Office of Emergency and Remedial Response

**TO:** Superfund Regional Policy Managers  
Regions 1 - 10

This memorandum transmits the attached final guidance, "Close Out Procedures for National Priorities List Sites." The guidance supersedes the August 1995 guidance of the same name, and it combines several fact sheets and memoranda into one document.

This guidance does not include suggested revisions to the construction completion definition that were discussed at the November 1999 National Policy Managers meeting. We are still considering those revisions and will get back to you separately on them.

Additional copies of this guidance will soon be available electronically on the Office of Emergency and Remedial Response (OERR) web site. If you have any questions, please contact your OERR Accelerated Regional Response Center.
