**Monday, June 12<sup>th</sup>  
6:30-8:00 p.m.  
Join in person or virtually!**

**BCYF Hyde Park  
Community  
Center 1179 River  
Street Hyde Park,  
MA 02136**

**Join online using the  
ZOOM link, QR code, or**

**by phone:**

+1 (646) 828-7666  
then dial the  
Meeting ID:  
1605741364#

*The U.S. Environmental Protection Agency (EPA) recently began the remedial investigation of the Lower Neponset River, as well as cleanup activities near the Fairmont MBTA station (the former Lewis Chemical site) and a site investigation of a dredge spoil near Riverside Square.*

*EPA relies on community comments to understand local priorities and concerns during cleanup decision-making. To support healthy communities and strengthen environmental protection, EPA works closely with communities to make sure they have the technical help they need. More details will be discussed in detail during this public meeting. Translation services are available upon request.*
