

Lower Neponset River Superfund Site

Phase 1 Data Evaluation Memorandum Presentation

MARCH 25, 2025 | 6 P.M. TO 8 P.M. EST

**BCYF HYDE PARK COMMUNITY CENTER
1179 River Street-Hyde Park, MA**

The EPA's Technical Assistance Services for Communities (TASC) program (a technical environmental resource being provided to help educate the community) is sharing a presentation to review and discuss the data collected in phase 1 of the Lower Neponset Superfund cleanup. This data helps assess pollution levels and guides future cleanup efforts. Please come join your fellow neighbors to learn more about cleanup work that will soon be underway to remove hazardous substances in the Neponset River and create a cleaner environment. Also, hear about how your voice matters, strengthens, and has an impact in EPA's decision-making process.

For more information on the site and cleanup activities, please visit: epa.gov/neponsetriver

For general Community Advisory Group information, please visit: epa.gov/superfund/superfund-community-advisory-groups
