4.9.24

December 4, 1996

Dear New Bedford Harbor Abutter,

I am sending this letter to ensure that you have been informed of the U.S EPA's recent cleanup proposal for New Bedford Harbor's PCB-contaminated sediment problem, and to remind you that EPA is soliciting public comment on this proposal. You may have already seen reports of this cleanup plan in the local and regional press. As a land owner of or resident on property near the harbor, you may have special concerns which EPA wishes to identify in a timely fashion. This is especially true since EPA's cleanup proposal includes the construction and operation of four shoreline confined disposal facilities (or CDFs), some of which may abut or be in the vicinity of your property.

EPA's "phase 2" cleanup proposal is described in more detail in the attached document entitled "Proposed Cleanup Plan, Upper and Lower New Bedford Harbor, New Bedford, MA." I encourage you to review this plan, especially the summary box on page 1 and the illustrative figures on pages 3 and 4. In order to give you a better sense of where the phase 2 shoreline facilities will be located, I have also included two overhead maps showing the locations of the four CDFs. Should you have any comments on the phase 2 cleanup plan after reviewing these documents, please submit them in writing to me at the address listed on page 16 of the Proposed Cleanup Plan. In order to be made part of the official record for this site, these comments must be postmarked no later than January 23, 1997.

Should you be a direct abutter to one of the four proposed CDFs, EPA wishes to ensure you that we are committed to working with you throughout the design, construction and operation process to mitigate any special concerns that you may have. Once these facilities are completed, there is an interesting potential for beneficial reuse of the new land created. Such reuses include shoreline open space, commercial marine facilities and recreational areas, among others. We look forward to working with all concerned parties to fashion CDF designs and end uses which all can live with.

Should you have questions in this regard, please do not hesitate to call me at 617/573-5735.

Sincerely,

David Dickerson,
Remedial Project Manager
