TO THE EPA  
Re: Nyanza testing in Area 8

April 18, 1985

I am a resident of 50 Cherry St. in Ashland, which lies approximately 50' from the Chemical brook intersection with the RR at Cherry St. Tilton Av. is directly across from our house.

I currently rent an apartment; there are 2 other apartments in the house. The landlord (4 owner) lives in one of these apartments.

We have a significant water problem in the basement, and a definite odor appears at times. I would like to request that the EPA test as soon as possible the basement water.

Please contact me re: when this testing can occur. I will speak with the owner if necessary.

Sincerely,

Laura Miller
