Hi Karen & Tim,

I have attached the profile report from our system as well as the manifest/LDR. These profiles were generated for the work done in 2008 and, that I can tell, no shipments were done before or since that time.

- CH332454 is the used plate developer.
- The drum to the rear of the manufacturing area I believe is Ink/isopropanol. This material previously went out as a lab pack as it was in a bunch of reused 5 gallon containers that were not sealable for shipment.
- The drum in the left hand part of the building with all the tables, to the right near what used to be the photo developing room and now looks like a closet is the fixer/developer with silver

If you need anything further please let me know.

Subject: Van Eck-Tilman

Hi John,

Per our phone conversation, the Profiler # from the picture of the drum that I have is CH 332454.

Thanks again for volunteering your assistance!!

SEMS DocID 642159

Karen
