**Re: GE-Pittsfield/Housatonic River Site  
Rest of River (GEC850)  
2022 Annual Report on Biota Consumption Advisory Outreach Activities for Housatonic Rest of  
River in Massachusetts**

Dear Mr. Fontaine:

Attached for the General Electric Company (GE) is a report entitled *2022 Annual Report on Biota Consumption Advisory Outreach Activities: Housatonic Rest of River – Massachusetts*, prepared for GE by Arcadis. This report is submitted in accordance with GE's Biota Consumption Advisory Outreach Plan for the Housatonic Rest of River in Massachusetts, which was submitted on July 12, 2019 and approved by EPA on July 16, 2019. This report describes the outreach activities conducted on GE's behalf in 2022, including the inspection and replacement of biota consumption advisory signs along the Massachusetts portion of the Rest of River, as well as the provision of the Massachusetts Department of Public Health pamphlet describing the consumption advisory to fishing and hunting license distributors and other relevant entities in Berkshire County. The report also describes the biota consumption advisory outreach activities planned for 2023 and future years.

Please let me know if you have any questions about this annual report.

Very truly yours,

Kevin G. Mooney  
Senior Project Manager – Environmental Remediation

Appendix B	<i>Advice for Eating Fish and Waterfowl from the Housatonic River Area in Massachusetts (in both English and Spanish)</i>

# 1 Introduction

On July 12, 2019, the General Electric Company (GE) submitted to the U.S. Environmental Protection Agency (EPA) a Biota Consumption Advisory Outreach Plan for the Housatonic Rest of River in Massachusetts (Outreach Plan; Arcadis, 2019). That submittal presented GE's plan for supporting EPA and Massachusetts in improving public awareness of the biota consumption advisories issued by the Massachusetts Department of Public Health (MassDPH) for the Housatonic River in Massachusetts. The Outreach Plan was submitted in accordance with the requirements of Section II.B.6.a of a Modified Resource Conservation and Recovery Act (RCRA) Permit issued to GE by EPA on October 24, 2016, pursuant to the 2000 Consent Decree for the GE-Pittsfield/Housatonic River Site, relating to the portion of the Housatonic River downstream of the confluence of the East and West Branches of the River in Pittsfield (referred to as the "Rest of River"). Following an appeal of that permit to the EPA Environmental Appeals Board and remand by that Board, EPA revised the permit and issued a Revised Modified Permit on December 16, 2020. The requirements relating to GE's cooperation with and support of EPA and Massachusetts regarding biota consumption advisories are now located in Section II.B.7.a of the Revised Modified Permit, but are otherwise unchanged from those in the 2016 Permit.

Specific activities described in the Outreach Plan included: (1) producing, posting, inspecting, and replacing revised biota consumption advisory signs along the Massachusetts portion of the Rest of River; (2) providing fishing and hunting license distributors in Berkshire County and other relevant entities with copies of the then-current MassDPH pamphlet setting forth the biota consumption advisory for the Housatonic River (as well as the state-wide advisory); and (3) submitting an annual report to EPA summarizing the inspection activities conducted for the biota consumption advisory signs during the prior year and identifying the entities to which copies of the MassDPH biota consumption advisory pamphlets were distributed during the prior year. EPA approved the Outreach Plan by letter dated July 16, 2019.

GE performed the activities described in the Outreach Plan during 2019 and 2020, and submitted annual reports on those activities in February 2020 and February 2021, respectively (Arcadis 2020, 2021). EPA conditionally approved both reports by letter dated June 17, 2021. In its letter, EPA directed GE to use the latter report as the template for future annual reports subject to the conditions specified in the letter. In 2021, GE performed the activities described in the Outreach Plan and documented the work in the *2021 Annual Report on Biota Consumption Advisory Outreach Activities in Massachusetts*, dated February 28, 2022 (Arcadis 2022), using the 2020 report as a template. EPA conditionally approved the 2021 report by letter dated May 10, 2022.

As background, the Commonwealth of Massachusetts has a general state-wide consumption advisory for eating fish, shellfish, and waterfowl caught in waters of the Commonwealth. It also has specific biota consumption advisories for the freshwater bodies in Massachusetts. These advisories, issued by MassDPH, are based on the presence or potential presence of polychlorinated biphenyls (PCBs), mercury, and/or other chemicals in the tissue of the biota. The current biota consumption advisories for the Housatonic River in Massachusetts apply to the consumption of fish, frogs, and turtles from the River between Pittsfield and the Connecticut border and to the consumption of wood ducks and mallard ducks from the River between Pittsfield and Rising Pond in Great Barrington. These specific consumption advisories are based upon findings of PCBs in the tissues of these biota, although the Housatonic River is also subject to the general state-wide advisory.

2022 Annual Report on Biota Consumption Advisory Outreach Activities  
Housatonic Rest of River – Massachusetts

This report describes biota consumption advisory outreach activities performed by Arcadis on GE's behalf in 2022. Section 2 describes the inspection and replacement, as necessary, of signs in 2022. Section 3 describes the provision of written notices regarding biota consumption advisories in Massachusetts. Section 4 describes future outreach activities, including continued inspection and replacement of advisory signs, provision of biota consumption advisory pamphlets, and submission of annual reports on those activities.

## 2 Inspection, Maintenance, and Posting of Advisory Signs

During June and July 2022, the polyethylene biota consumption advisory signs that were previously posted at likely public access points along the Massachusetts portion of the Rest of River were inspected and replaced where necessary. In addition, during July and August 2022, new signs were posted along the West Branch of the Housatonic River and several Rest of River tributaries. The signs, both for the reaches of the Housatonic River and its tributaries between Pittsfield and Rising Pond in Great Barrington and for the reach of the River from Rising Pond to the Connecticut border, are depicted below as Figures 1 and 2, respectively. More details regarding the inspection and posting of these signs in 2022 are described below after the figures.

Figure 1. Massachusetts Fish, Frog, Turtle, Wood Duck, and Mallard Duck Consumption Advisory Sign for the Housatonic River and its Tributaries from Pittsfield South to Rising Pond in Great Barrington

Figure 2. Massachusetts Fish, Frog, and Turtle Consumption Advisory Sign for the Housatonic River from Rising Pond Dam to the Connecticut Border

On June 8, 2022, GE notified EPA of its plans and timetable for inspecting the previously posted signs and for installing new signs along the West Branch of the Housatonic River and several Rest of River tributaries in accordance with EPA's June 17, 2021 conditional approval letter.<sup>1</sup> On June 13, 2022, EPA provided recommended locations for the new tributary signs, which included moving one location. Subsequently, on

<sup>1</sup> In that June 17, 2021 letter, EPA stated that it was reviewing and discussing the current content of the signs with the State of Massachusetts, and that any modifications that EPA determines are necessary to the signs, such as including additional translations, updates to the imagery, and/or addition of a QR code linking the public to relevant information on the State's website regarding the biota consumption advisories, would be provided to GE. No such changes were provided to GE in 2022.

2022 Annual Report on Biota Consumption Advisory Outreach Activities  
Housatonic Rest of River – Massachusetts

June 20, June 21, July 11, and July 22, Arcadis, on behalf of GE, performed the inspection and maintenance of the previously posted signs. Signs were inspected and replaced as necessary and photo documentation was obtained. On July 28, July 29, August 1, and August 2, 2022, Arcadis, on behalf of GE, installed new signs along the tributaries as proposed by EPA. Specifically, new signs were posted at two locations along the West Branch of the Housatonic River, one location along Wampenum Brook (the brook flowing from Morewood Lake), two locations along Sackett Brook, one location along Sykes Brook (moved from Yokun Brook by EPA), two locations along Mill Brook, one location along Roaring Brook, and one location along Felton Lake Brook. At each new location, a fish, frog, turtle, wood duck, and mallard consumption advisory sign (Figure 1) was posted, and locational coordinates and photo documentation were obtained.

Table 1 lists the locations of all consumption advisory signs installed along the Rest of River and its tributaries in Massachusetts, as well as their most recent installation date, their locational coordinates and elevation, and comments showing the results of the 2022 inspection for each of those signs, including maintenance activities performed. The locations of the consumption advisory signs from Pittsfield to Lee are depicted on Figure 3 (attached), the locations of the signs from Lee to Great Barrington are depicted on Figure 4 (attached), and the locations of the signs from Great Barrington to the Connecticut border are depicted on Figure 5 (attached). A sign photographic log is provided in Appendix A. Locational information is being maintained in a Geographic Information System (GIS) geospatial database and locational map, developed to assist with regular inspections and replacement of signage.

In addition to the above inspection and maintenance activities, GE, at the request of EPA, provided one fish, frog, and turtle sign (Figure 2) to the Berkshire Natural Resources Council on June 17, 2022 to post at its Housatonic Flats location. This location is in the section of the Housatonic River between Rising Pond and the Connecticut border. Arcadis did not observe the sign to be present during its July 11, 2022 visit.

### 3 Provision of Biota Consumption Advisory Pamphlets

On April 15, 2022, Arcadis, on behalf of GE, distributed copies of the MassDPH pamphlet setting forth the biota consumption advisory for the Housatonic River (as well as the state-wide advisory), together with a cover letter, to fishing and hunting license distributors in Berkshire County and other relevant entities (listed below). Copies of the pamphlet were provided to those license distributors in both English and Spanish. Copies of the pamphlet provided (in both English and Spanish) are included in Appendix B.<sup>2</sup>

The entities that were provided biota consumption advisory pamphlets and cover letters in hard copy format were:

- The local Massachusetts Division of Fisheries and Wildlife (MassDFW) Western District Office at 88 Old Windsor Road in Dalton;
- The City of Pittsfield clerk's office;
- The following additional license vendors:
  - Dick's Sporting Goods – Pittsfield;
  - Walmart – Pittsfield;
  - Mill River General Store – Mill River;
  - Walmart – North Adams;
  - Overwatch Outpost – Charlemont;
- The following game check stations:
  - Corner Grocery and Café – Worthington;
  - Avid Sports – Pittsfield;
  - Dave's Sporting Goods – Pittsfield;
  - Pete's Gun Shop – Adams;
  - Smitty's Sporting Goods – Dalton;
  - Goshen General Store – Goshen;
  - Cheshire Sporting Goods – Cheshire;
- The following official weigh stations:
  - Onota Boat Livery – Pittsfield;
  - Taft's Tackle – Great Barrington;
  - Crea's Bait and Tackle – Pittsfield;
- The Boards of Health in Pittsfield, Dalton, Lenox, Lee, Stockbridge, West Stockbridge, Great Barrington, and Sheffield, as well as the Tri-Town Health Department; and

---

<sup>2</sup> In its June 17, 2021 conditional approval letter, EPA stated that, in addition to reviewing the advisory signs, it was reviewing and discussing the current content of the MassDPH's informational pamphlets with the State. GE was not notified of any resulting modifications to the text or format of the pamphlets in 2022.

2022 Annual Report on Biota Consumption Advisory Outreach Activities  
Housatonic Rest of River – Massachusetts

- All Sportsmen's clubs in the MassDFW Western District, which include those in Pittsfield, Lee, Lenox, and Stockbridge and the Berkshire County League of Sportsmen.

In addition, based on discussions with EPA, electronic copies of the informational pamphlets were provided to the town clerks' offices in Dalton, Lenox, Lee, Stockbridge, West Stockbridge, Great Barrington, Sheffield, and Huntington on April 15, 2022.

In its cover letters to all fishing and hunting license agents, GE requested these license agents to distribute the pamphlet to all persons obtaining a fishing or hunting license. In its letters to the Sportsmen's clubs and League of Sportsmen, GE requested that they inform their members of the biota consumption advisory for the Housatonic River. In addition, in all cover letters transmitting hard copies of the pamphlet, GE committed to providing the recipients with a reasonable number of additional pamphlets if requested. No additional pamphlets were requested in 2022.

In its cover letters to the town clerk's offices, GE noted that electronic copies of the pamphlet were being provided at EPA's request so that the towns could upload the pamphlets to their respective websites. In addition, GE committed to providing the recipients with hard copies of the pamphlet if requested. No hard copies were requested in 2022.

## 4 Future Activities

### 4.1 Inspection and Replacement of Advisory Signs

GE will continue to conduct annual inspections of the Housatonic River in Massachusetts to determine whether the consumption advisory signs that were placed at public access points are still present. If signs are missing, vandalized, or deemed illegible or if additional likely public access points are identified, GE will produce replacement or additional signs and post them at the appropriate locations. In addition, GE will ensure that the signs remain visible to the public and will provide maintenance through removal of obscuring vegetation and/or overgrowth.

In addition, if requested by the State of Massachusetts (the “State”), GE will provide additional signs to the State. At the State’s discretion, these additional signs will be posted and monitored by the State at additional locations outside the Housatonic River and the tributaries listed above.

Further, if, at another time outside the regularly scheduled inspections, EPA or Massachusetts Department of Environmental Protection (MassDEP) identifies a specific location or locations where the posting of a replacement or additional sign is warranted, GE will provide the requested sign(s) and post it/them at the appropriate location(s).

Signs will be posted so that, to the extent practicable, the bottom of the signs is no higher than six feet from the viewer’s ground level. Additionally, GE will update the GIS geospatial database and locational map of all sign locations as needed to assist with regular inspections and replacement of signage.

Prior to the inspections, GE will advise EPA of its plans and schedule for inspecting the existing signs and, as necessary, replacing them. Unless otherwise advised by EPA, the signs to be posted in 2023 as new or replacement signs will be those shown on Figures 1 and 2 above (depending on location).

In the event that, at any time, EPA advises GE that revisions to the signs are necessary, GE will consult with EPA, MassDEP, MassDFW, and MassDPH, as appropriate, regarding such revisions. Specifically, if, based on discussions with the State, EPA determines that modifications are necessary to the signs, such as including additional translations, updates to the imagery, and/or addition of a QR code linking the public to relevant information on the State’s website regarding the biota consumption advisories, EPA will advise GE of the modifications. In the event that new translations are necessary, EPA will provide those new translations to GE. If and when EPA advises GE of any necessary modifications to the signs, GE will provide a mock-up of the signs, in the designated languages, to EPA for final approval before new signs are fabricated for installation.

GE will repeat the sign inspection and maintenance activities on an annual basis until such time as the advisories are discontinued or this program is modified with EPA approval.

### 4.2 Provision of Biota Consumption Advisory Pamphlets

Also on an annual basis, GE will continue to provide fishing and hunting license distributors in Berkshire County and other relevant entities (listed below) with copies of the then-current MassDPH pamphlet setting forth the biota consumption advisory for the Housatonic River (as well as the state-wide advisory) and an appropriate cover letter. The pamphlet will be provided in both English and Spanish, and, in 2023, will be the

2022 Annual Report on Biota Consumption Advisory Outreach Activities  
Housatonic Rest of River – Massachusetts

same as the one included in Appendix B, also available at <https://www.mass.gov/doc/fish-and-waterfowl-consumption-advice-for-the-housatonic-river-area-in-massachusetts/download> (English) and <https://www.mass.gov/doc/fish-and-waterfowl-consumption-advice-for-the-housatonic-river-area-in-massachusetts-spanish/download> (Spanish). Specifically, GE will provide that biota consumption advisory pamphlet (in both languages) and a cover letter in hard copy format to the following:

- The local MassDFW Western District Office at 88 Old Windsor Road in Dalton;
- The City of Pittsfield clerk's office;
- The following additional license vendors:
  - Dick's Sporting Goods – Pittsfield;
  - Walmart – Pittsfield;
  - Mill River General Store – Mill River;
  - Walmart – North Adams;
  - Overwatch Outpost – Charlemont;
- The following game check stations:
  - Corner Grocery and Café – Worthington;
  - Avid Sports – Pittsfield;
  - Dave's Sporting Goods – Pittsfield;
  - Pete's Gun Shop – Adams;
  - Smitty's Sporting Goods – Dalton;
  - Goshen General Store – Goshen;
  - Cheshire Sporting Goods – Cheshire
- The following official weigh stations:
  - Onota Boat Livery – Pittsfield;
  - Taft's Tackle – Great Barrington;
  - Crea's Bait and Tackle – Pittsfield;
- The Boards of Health in Pittsfield, Dalton, Lenox, Lee, Stockbridge, West Stockbridge, Great Barrington, and Sheffield, as well as the Tri-Town Health Department; and
- All Sportsmen's clubs in the MassDFW Western District, including those in Pittsfield, Lee, Lenox, and Stockbridge and the Berkshire County League of Sportsmen.

In addition, electronic copies of the informational pamphlets will be provided to the town clerks' offices in Dalton, Lenox, Lee, Stockbridge, West Stockbridge, Great Barrington, Sheffield, and Huntington.

In its cover letters to all fishing and hunting license agents, GE will request these license agents to distribute the pamphlet to all persons obtaining a fishing or hunting license. In its letters to the Sportsmen's clubs and League of Sportsmen, GE will request that they inform their members of the biota consumption advisory for the Housatonic River. In addition, in all cover letters transmitting hard copies of the pamphlet, GE will commit to provide the recipients with a reasonable number of additional pamphlets in either English or Spanish if requested. In its cover letters to the town clerk's offices, GE will note that electronic copies of the pamphlet

are being provided so that the towns can upload the pamphlet to their respective websites. In addition, GE will commit to providing the recipients with hard copies of the pamphlet if requested.

In addition, GE anticipates that, in the event that EPA or the State determines that any modifications to the text or format of the MassDPH's informational pamphlets (including additional translations) are necessary, EPA or the State will provide GE with revised pamphlets prepared by MassDPH, including any new translations, or direct GE to a website where the revised pamphlets can be found, prior to GE's distribution of those pamphlets.

GE will repeat the pamphlet distributions on an annual basis until such time as the advisories are discontinued or this program is modified with EPA approval.

### **4.3 Other Activities**

In addition to the activities described above, in the event that EPA, MassDEP, and/or MassDPH requests GE to provide information or technical assistance in connection with their public service announcements or public meetings to publicize MassDPH's biota consumption advisories, GE will provide such assistance.

### **4.4 Reporting**

Continuing for 2023 and subsequent years, GE will prepare and submit to EPA an annual report that summarizes the inspection and replacement activities conducted for the biota consumption advisory signs during the prior year and identifies the locations where copies of the MassDPH biota consumption advisory pamphlets were distributed during that year. In addition, GE will review the active license agent locations and provide in the annual report an updated list of the locations where the biota consumption advisory pamphlets will be sent in the following year. Further, in the annual report, GE will propose any changes to the biota consumption advisory outreach program or the current plan.

GE will submit the annual report for 2023 by February 29, 2024, and will thereafter submit such annual reports by the end of February in the year following the subject year.

**Housatonic River - 2022 Biota Consumption Advisory Sign Maintenance**  
**General Electric Company**  
**Pittsfield, Massachusetts**

Notes:

1. HR- Site Location identification consistent with identification during 2016 - 2020. Identification updated in 2016 to account for new signs and sequencing for numbering from upstream to downstream.
2. Units of Coordinates are in degrees, as measured with iPad global positioning system-based Maps application. Elevation in feet measured using Compass Deluxe application.
3. The sign at this location is a laminated photocopy of the sign attached to the Canoe Meadows information board by the Massachusetts Audubon Society. Its presence was originally documented by Arcadis in an inspection conducted in January 2020, as noted in the 2019 Annual Report.
4. Reach Designations:
  - Reach 4, Lyman Street Bridge to the Confluence
  - Reach 5, Confluence to Woods Pond, further divided into the following subreaches:
    - Reach 5A (Confluence to the Pittsfield Wastewater Treatment Plant)
    - Reach 5B (Pittsfield WWTP to Roaring Brook)
    - Reach 5C (Roaring Brook to the start of Woods Pond)
  - Reach 6, Woods Pond
  - Reach 7, Woods Pond Dam to Rising Pond, further divided into the following subreaches:
    - Reach 7A (Woods Pond Dam to the Columbia Mill Dam Impoundment)
    - Reach 7B (Columbia Mill Dam Impoundment)
    - Reach 7C (Former Eagle Mill Dam Impoundment)
    - Reach 7D (Former Eagle Mill Dam to the Willow Mill Dam Impoundment)
    - Reach 7E (Willow Mill Dam Impoundment)
    - Reach 7F (Willow Mill Dam to the Glendale Dam Impoundment)
    - Reach 7G (Glendale Dam Impoundment)
    - Reach 7H (Glendale Dam to Rising Pond)
  - Reach 8, Rising Pond
  - Reach 9, Rising Pond Dam to the Massachusetts/Connecticut border

## Appendix B

*Advice for Eating Fish and Waterfowl from the Housatonic River Area in Massachusetts (in both English and Spanish)*

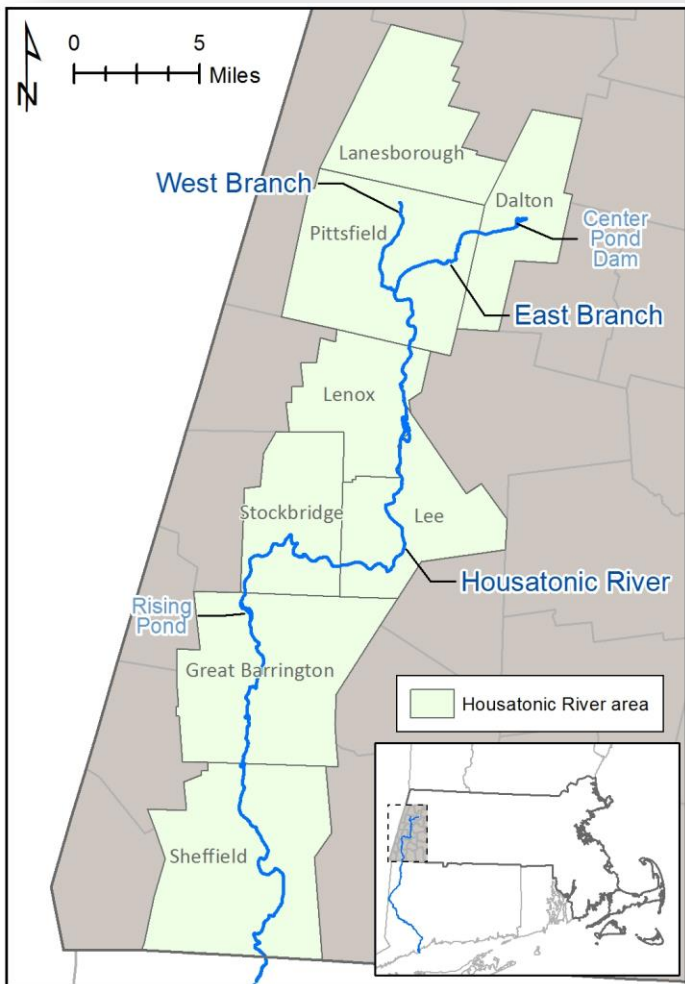

# Advice for Eating Fish and Waterfowl from the Housatonic River Area in Massachusetts

MDPH advises that **NO ONE** eat the following from the Housatonic River Area

**Do NOT eat:** Fish, frogs, and turtles from the Housatonic River and tributaries that feed into the main river from Center Pond Dam in Dalton to the Connecticut border.

**Do NOT eat:** Mallards and wood ducks from the Housatonic River and its impoundments from Pittsfield south to Rising Pond in Great Barrington.

## Information about the Housatonic River area

The Housatonic River area is made up of eight communities in Berkshire County: Lanesborough, Dalton, Pittsfield, Lenox, Stockbridge, Lee, Great Barrington, and Sheffield. There are three main branches of the Housatonic River—the East Branch, West Branch, and Southwest Branch—that combine to make up the main stem of the Housatonic River. The Housatonic River flows south from Pittsfield into Connecticut.

Due to releases of chemicals by the General Electric Company from the early 1930s through the late 1970s, polychlorinated biphenyls (PCBs) are present in soils, sediment, fish, and certain waterfowl in and around the Housatonic River area. PCBs do not break down easily in the environment.

While portions of the Housatonic River area have been cleaned up, PCBs may be present in fish and waterfowl at levels that could be harmful if eaten. For more information on the Housatonic River clean-up, visit [www.epa.gov/ge-housatonic](http://www.epa.gov/ge-housatonic).

## Effects of PCBs on health

- PCBs are suspected of causing liver problems, skin lesions or irritations, and some types of cancer.
- Children are especially sensitive to PCBs, especially during fetal development, nursing, and early growth. Exposure to small amounts of these chemicals may interfere with brain development even before birth.

## Fish and waterfowl in the Housatonic River

Fish and waterfowl in the area may be exposed to PCBs. PCBs are a group of man-made organic chemicals banned in the 1970s. PCBs can still be found in our environment and can get into our food due to their widespread use. PCBs can enter fish's bodies and concentrate in their skin, fat, internal organs and sometimes muscles. Larger species feed on smaller species. This causes PCB concentrations to be higher in larger, older fish. PCBs in sediments are also a concern for other aquatic species (e.g., ducks, frogs, turtles).

## How plants and animals are exposed to contaminants

Image adapted from the EPA *Housatonic River Ecological Risk Assessment, Fact Sheet*: <http://savethehousatonic.org/wp-content/uploads/2008/07/FactERA.pdf>

### Tips for fishing in the Housatonic River and its tributaries

- Observe posted warning signs and follow their advice.
- Do not eat fish from the Housatonic River and its tributaries.
- When fishing, release fish unharmed back into the river.
- Follow the State-wide Fish Consumption Advisory for other lakes, rivers, and ponds in the Housatonic River area in Massachusetts. More specific consumption advice is available for certain bodies of water that have been tested at [www.mass.gov/dph/fishadvisories](http://www.mass.gov/dph/fishadvisories).

### General State-wide Advice for eating fish caught in Massachusetts

The following is advised for pregnant women, women who may become pregnant, nursing mothers, and children under 12 years old:

- **Do Not Eat:** Freshwater fish caught in streams, rivers, lakes, and ponds in Massachusetts
- **Safe to Eat:** Fish that are stocked in streams, rivers, lakes, and ponds in Massachusetts

### General State-wide Advice for eating waterfowl caught in Massachusetts

Safe Guidelines for Eating Wild Waterfowl from areas *other* than the Housatonic River area:

- Skin and remove all fat before cooking
- Discard stuffing after cooking
- Drippings should not be used for gravy
- Eat waterfowl in moderation (no more than 2 meals per month)

### For more information

- To choose fish and waterfowl that are safe to eat, please contact the MDPH Bureau of Environmental Health at 617-624-5757 or 800-240-4266: [www.mass.gov/dph/environmental\\_health](http://www.mass.gov/dph/environmental_health)
- To learn more about stocked fish, please contact the MassWildlife Western District office, Dalton. Tel: (413) 684-1646 or visit [www.mass.gov/trout](http://www.mass.gov/trout). For fishing regulations visit [www.masswildlife.com](http://www.masswildlife.com).
- To learn more about the federal government's additional advice for safe fish consumption, please visit [www.fda.gov/fishadvice](http://www.fda.gov/fishadvice) and [www.epa.gov/fishadvice](http://www.epa.gov/fishadvice).

**Fish is good for you!**

**Continue to eat a variety of fish from safe sources. Fish is low in saturated fat, high in protein, and helps to prevent heart disease.**

Revised September 2019

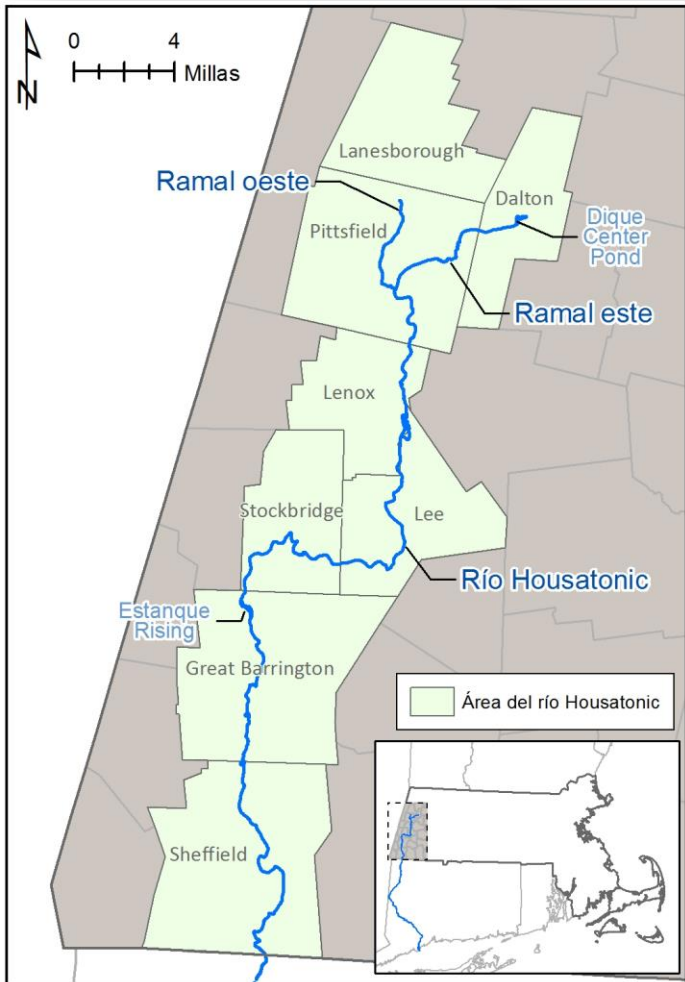

# Consejos para el consumo de pescado y aves acuáticas del área del río Housatonic en Massachusetts

El Departamento de Salud Pública de Massachusetts (MDPH) aconseja que **NADIE** consuma lo siguiente del área del río Housatonic

**NO consumir:** peces, ranas y tortugas del río Housatonic y sus afluentes que desembocan en el río principal desde el dique Center Pond en Dalton hasta la frontera de Connecticut.

**NO consumir:** ánades reales y patos joyuyos del río Housatonic y sus embalses desde Pittsfield sur hasta Estanque Rising en Great Barrington.

## Información sobre el área del río Housatonic

El área del río Housatonic está compuesta por ocho comunidades en el condado de Berkshire: Lanesborough, Dalton, Pittsfield, Lenox, Stockbridge, Lee, Great Barrington y Sheffield. El río Housatonic tiene tres ramales principales: el ramal este, el ramal oeste y el ramal suroeste, que se combinan para formar el curso principal del río Housatonic. El río Housatonic fluye hacia el sur desde Pittsfield hasta Connecticut.

Debido a las emisiones de sustancias químicas por parte de General Electric Company desde principios de los 30 hasta finales de los 70, existe la presencia de bifenilos policlorados (PCB) en suelos, sedimentos, peces y determinadas aves acuáticas dentro y alrededor del área del río Housatonic. Los PCB no se descomponen fácilmente en el medioambiente.

Si bien se han limpiado algunas partes del área del río Housatonic, los PCB pueden estar presentes en peces y aves acuáticas en niveles que podrían ser perjudiciales en caso de consumo. Para obtener más información sobre la limpieza del río Housatonic, ingrese en [www.epa.gov/ge-housatonic](http://www.epa.gov/ge-housatonic).

## Efectos de los PCB en la salud

- Se sospecha que los PCB causan problemas hepáticos, lesiones o irritación en la piel, y algunos tipos de cáncer.
- Los niños son particularmente sensibles a los PCB, especialmente durante el desarrollo fetal, la lactancia y la primera etapa del crecimiento. La exposición a pequeñas cantidades de estas sustancias químicas puede afectar el desarrollo cerebral, incluso antes del nacimiento.

## Peces y aves acuáticas en el río Housatonic

Los peces y las aves acuáticas de la zona pueden estar expuestos a PCB. Los PCB son un grupo de sustancias químicas orgánicas sintéticas prohibidas en los 70. Todavía se pueden encontrar en nuestro medioambiente y pueden introducirse en nuestros alimentos debido a su uso generalizado. Los PCB pueden introducirse en el cuerpo de los peces y concentrarse en la piel, la grasa, los órganos internos y, en ocasiones, en los músculos. Las especies más grandes se alimentan de especies más pequeñas. Esto hace que las concentraciones de PCB sean mayores en los peces más grandes y más viejos. Los PCB presentes en sedimentos también representan una inquietud para otras especies acuáticas (p. ej.: patos, ranas, tortugas).

## Cómo las plantas y los animales están expuestos a los contaminantes

Imagen adaptada de la *Evaluación de riesgos ecológicos del río Housatonic* de la Agencia de Protección Ambiental de Estados Unidos (EPA), Hoja informativa: <http://savethehousatonic.org/wp-content/uploads/2008/07/FactERA.pdf>

### Consejos para pescar en el río Housatonic y sus afluentes

- Observe las señales de advertencia y siga sus consejos.
- No coma pescado del río Housatonic y sus afluentes.
- Al pescar, libere a los peces ilesos en el río.
- Siga las Recomendaciones para el consumo de pescado en todo el estado para otros lagos, ríos y estanques del área del río Housatonic en Massachusetts. Existen consejos más específicos sobre el consumo para determinadas masas de agua que se han probado en [www.mass.gov/dph/fishadvisories](http://www.mass.gov/dph/fishadvisories).

### Consejos generales para todo el estado para el consumo de peces capturados en Massachusetts

La siguiente es una recomendación para mujeres embarazadas, mujeres que puedan quedar embarazadas, madres lactantes y niños menores de 12 años:

- **No consumir:** peces de agua dulce capturados en arroyos, ríos, lagos y estanques de Massachusetts
- **Seguro para el consumo:** peces de arroyos, ríos, lagos y estanques de Massachusetts

### Consejos generales para todo el estado para el consumo de aves acuáticas capturadas en Massachusetts

Pautas de seguridad para el consumo de aves acuáticas salvajes procedentes de áreas diferentes al área del río Housatonic:

- Despellejar y quitar toda la grasa antes de cocinar.
- Desechar el relleno después de cocinar.
- Los goteos de grasa no deben utilizarse para preparar salsas.
- Consumir las aves acuáticas con moderación (no más de 2 comidas por mes).

### Para obtener más información

- Para elegir pescados y aves acuáticas cuyo consumo sea seguro, póngase en contacto con la Oficina de Salud Ambiental del MDPH llamando al 617-624-5757 o 800-240-4266: [www.mass.gov/dph/environmental\\_health](http://www.mass.gov/dph/environmental_health)
- Para obtener más información sobre las poblaciones de peces, póngase en contacto con la oficina del Distrito Oeste de Vida Silvestre de Massachusetts, en Dalton. Tel.: (413) 684-1646 o ingrese en [www.mass.gov/trout](http://www.mass.gov/trout). Para conocer las regulaciones de pesca, ingrese en [www.masswildlife.com](http://www.masswildlife.com).
- Para obtener más información sobre los consejos adicionales del gobierno federal para el consumo seguro de pescado, ingrese en [www.fda.gov/fishadvice](http://www.fda.gov/fishadvice) y [www.epa.gov/fishadvice](http://www.epa.gov/fishadvice).

**¡El pescado es bueno para usted!**

**Siga comiendo una variedad de pescados de fuentes seguras. El pescado tiene bajo contenido de grasas saturadas, alto contenido de proteínas, y ayuda a evitar enfermedades cardíacas.**
