Re: EPA approval of the Addendum Number Two to the Soil Source Area Removal Action Work Plan for the Lightman Drum Company Superfund Site, Winslow Township, New Jersey - Administrative Settlement Agreement and Order On Consent, Index #: CERCLA-02-2007-2007

Dear Mr. Finn:

The United States Environmental Protection Agency (EPA) conditionally approves Golder Associates February 4, 2009 Addendum Number Two to the Soil Source Area Removal Action Work Plan for the Lightman Drum Company Superfund Site, Winslow Township, New Jersey. The conditional nature of this approval relates to the "VOC Area Investigation" outlined in Section 3 of the Addendum. The investigation presented in this section is based significantly on the use of field screening and decision making in the field based on that screening. While this is an acceptable approach, EPA cannot at this time be sure that it will satisfy the requirements for a Remedial Investigation of this area. As a result, EPA reserves its right to require additional sampling, should it be deemed necessary, to support a Remedial Investigation. As per paragraph 36 of the Administrative Settlement Agreement and Order On Consent, Index #: CERCLA-02-2007-2007, the approved Addendum to the Work Plan is now incorporated into and is now an enforceable part of the Order.

If you have any questions regarding this approval please contact me at (732)-906-6879.

Sincerely

David Rosoff
On Scene Coordinator
