Dear Congressman Gilman,

I enclose some materials I have prepared in connection with the ongoing saga of the PCBs in the Hudson River:

- (1) Citizen comment to US EPA over their outrageous Record of Decision under Superfund I (+ remarks on how every position they have taken on PCB's in New York is 180° about from their position on PCBs in New Bedford, MA.)
- (2) A long paper summarizing the history and current status of the Hudson River PCB situation.

Thank you for your attention to these materials -

Cordially yours,

John E. Sanders
