October 9, 1980

COMBE LANDFILL

1. Suggest that test wells similar to #1, 2, 3, 4, & 5 be installed on the Washington Township west side of the landfill to monitor ground water.
2. Suggest that Washington Township join with Chester Township and "engage the services of an impartial environmental engineer, knowledgeable in the sanitary landfills and their maintenance, to report the exact condition of the landfill to determine whether any violations exist, as to leachate, height of landfill, etc."
3. Suggest that in conjunction with accepted methods set by an engineering firm (as #2 above) excavate a deep trench between Trout Brook and the landfill on the Bostick property to determine, by testing the ground water at that level, if contaminants not consistent with virgin ground are present.
4. On Thursday, October 16, 1980 at 1:00 p. m. Mr. Peter Joseph and Mr. Richard Maloof, residents, and the health officer will walk the area in question. Any and all Board members are invited.

Raynour H. Rudolph
Health Officer
