Town of Hartford  
Hartford, NY 12838

Dear Mr. Aubrey:

This is in response to your letters of June 9, 1997 to EPA Administrator Carol Browner and EPA Region 2 Administrator Jeanne M. Fox regarding the Hudson River PCBs site. Your letters forward a copy of a recent Resolution by the Town of Hartford in which the Town expresses its opposition to any remediation measures for the site that involve the dredging of PCB-contaminated sediments from the Hudson River and the disposal of those sediments in a landfill.

EPA is aware of the concerns of a number of members of the Upper Hudson River community associated with potential dredging of PCB-contaminated sediments from the Upper Hudson River. As you know, EPA has not yet determined whether it will be appropriate or necessary to dredge Hudson River sediments in order to address PCB contamination in the Upper Hudson River. Such a decision will be made only after EPA completes its Reassessment study of the Hudson River PCBs site which, when completed, will include a detailed characterization of the PCB contamination in the Upper Hudson River and the risks associated with that contamination. EPA also will prepare and release for public comment a Feasibility Study in which the Agency will evaluate several remedial options for the River sediments, including "no-action" and various dredging alternatives. "Community acceptance" is one of the criteria that must be considered by EPA when the Agency ultimately makes a remedial decision for the Upper Hudson River sediments and, while EPA cannot sacrifice protection of human health and the environment in favor of community acceptance, public comments can play a significant role in EPA's ultimate remedial decision.

In March 1996, EPA staff made a presentation to the Washington County Board of Supervisors on the Hudson River PCBs Reassessment study. EPA is willing to make additional presentations to the Board of Supervisors, or a similar group, to keep you informed of the findings of the Reassessment. Please contact Ann Rychlenski at (212) 637-3672 if you wish to arrange for such a briefing.

Sincerely yours,
