Ms. Jeanne M. Fleury  
Town of Moreau  
Town Office Building  
P.O. Box 1349  
South Glens Falls, New York 12803

Dear Ms. Jeanne M. Fleury:

This letter is in response to your letter dated April 13, 2000 to EPA Administrator Carol Browner, and others, concerning the Hudson River PCBs site Reassessment Study. Your letter forwards a copy of a recent Resolution by the Town of Moreau in which the Town expresses its opposition to any dredge and landfill option to address hazardous waste, specifically PCB-contaminated sediments, in the Hudson River.

EPA is aware of public concerns regarding PCB-contaminated sediments in the Hudson River. However, EPA has not yet determined whether it will be appropriate or necessary to select a dredge and landfill option in order to address PCB contamination in the Upper Hudson River. Such a decision will be made only after EPA completes the Reassessment of the Hudson River PCBs site which will include, among other things, a detailed characterization of the PCB contamination in the Upper Hudson River and the risks associated with that contamination, and an analysis of remedial options for addressing the PCB-contaminated sediments. EPA is scheduled to announce its preferred remedial option for the Hudson River PCBs site in December 2000, and to issue a final remedial decision for the site in June 2001. EPA will accept public comment on its preferred remedial option and respond to significant public comments on its proposal in a responsiveness summary to be issued together with the Agency's final decision.

We hope that this letter addresses your concerns. EPA appreciates your interest in the Reassessment process, and we encourage you to continue to express your concerns regarding the Reassessment.

If you have any questions or require more information, please feel free to contact Ann Rychlenski at (212) 637-3672.

Sincerely yours,

Richard L. Caspe, Director  
Emergency and Remedial Response Division

April 13, 2000

The Honorable Carol M. Browner, Administrator  
United States Environmental Protection Agency  
401 M Street SW-Room 1200WT  
Washington, DC 10460

Dear Ms. Browner:

At a meeting of the Town Board Town of Moreau held on April 12, 2000 the enclosed resolution was unanimously adopted reaffirming the Town of Moreau Town Board's position on the dredging of the Upper Hudson River and creation of a Toxic Waste Landfill.

Sincerely,

A handwritten signature in cursive script that reads "Jeanne M. Fleury".

Jeanne M. Fleury  
Town Clerk

A motion was made by Councilman Prendergast and seconded by Councilman Bulman to adopt the following resolution reaffirming the Town of Moreau's position on the dredging of the Upper Hudson River and creation of a Toxic Waste Landfill:

**WHEREAS, the U.S. Environmental Protection Agency is reassessing its 1984 decision not to dredge the Upper Hudson River to remove buried sediment containing PCBs, and**

**WHEREAS, the EPA has released a report that suggests the Agency may be preparing to reverse its position and order dredging, and**

**WHEREAS, PCB landfill projects have twice before been proposed for agricultural properties in the Town of Fort Edward and have twice been stopped through legal action, political action and the vigilance of citizens of Fort Edward, Washington County and surrounding communities, and**

**WHEREAS, the Town Board of the Town of Fort Edward has steadfastly opposed Upper Hudson River remediation options that involve PCB dredge-and-landfill projects of any kind, and has asked other municipalities to join Fort Edward in opposition to such projects based on their negative regional impacts, and**

**WHEREAS, a PCB dredge-and-landfill project would have significant, long-term adverse environmental, economic, and social consequences for all Upper Hudson River communities, especially affecting the agricultural industry, which depends on consumer confidence in the purity of its products, confidence likely to be undermined by the presence of a hazardous waste landfill; and especially impairing the continuing efforts to make local communities attractive places to live, work and raise families because a PCB landfill would destroy forever the pastoral quality of life that is our greatest asset, and**

**WHEREAS, a Hudson River dredging project would disrupt normal recreational use of the river and jeopardize future public and private investments in river-related amenities affecting the entire Upper Hudson region, and**

**WHEREAS, the mere possibility of a PCB dredge-and-landfill project adversely affects land values throughout the Upper Hudson and discourages private investment that might lead to the creation of new jobs, and**

**WHEREAS, representatives of Washington County and many local governments have taken an active role in EPA's public meetings and have repeatedly asked EPA to evaluate all the adverse impacts of a PCB landfill on the resources and economy of the county, and**

**WHEREAS, EPA has conducted no such evaluation and has made no commitment to conduct such an evaluation before any decision to establish a PCB landfill is reached, and**

**WHEREAS, a significant body of scientific evidence demonstrates that conditions in the Hudson River are improving, with PCB levels declining in water, sediments and fish, such that the State of New York has reopened the catch-and-release fishery in the Upper River, and**

**WHEREAS, dredging contaminated sediments has been shown to be ineffective in improving environmental conditions elsewhere, and**

**WHEREAS, there is no credible scientific evidence that dredging sediments from the bottom of the Hudson River would significantly accelerate the improvements already taking place as a result of ongoing remediation work and the river's natural recovery processes, and**

**WHEREAS, EPA itself determined in 1984 that a major dredging project "could be environmentally devastating to the river ecosystem and cannot be considered to adequately protect the environment, "(USEPA, Superfund Record of Decision at Page 8) and determined that "the actual reliability and effectiveness of current dredging technologies in this particular situation is subject to considerable uncertainty,""(Decision at Page 11), and**

**WHEREAS, EPA recognized that the many tons of material to be removed in a dredging would require an "impracticably large containment facility" (Decision at Page 8), and**

**WHEREAS, the Town Board of the Town of Moreau finds there is no demonstrated environmental benefit to a dredge-and-landfill project on the Hudson River and many unmitigated long-term negative environmental, economic and social consequences affecting the entire region, and**

**WHEREAS, the Town Board of the Town of Moreau finds that a dredge-and-landfill project would be a gross, unwarranted and unnecessary insult to the Hudson River itself and the communities of the Upper Hudson region, now, therefore,**

**BE IT RESOLVED, that the Town Board of the Town of Moreau in concert with the Town Board of the Town of Fort Edward, hereby expresses its opposition**

to Hudson River remediation measures that involve dredge-and-landfill efforts of any kind and hereby transmits notice of such opposition, in writing, to U.S. Environmental Protection Agency Administrator Carol Browner; Region II USEPA Administrator Jeanne M. Fox; U.S. Senator Daniel Patrick Moynihan, U.S. Senator Joseph Bruno and U.S. Senator Charles Schumer; U.S. Representative John E. Sweeney; New York Governor George E. Patki; New York State Environmental Conservation Commissioner John Cahill; New York State Senator Ronald B. Stafford, and New York State Assemblyman Bobby D'Andrea and New York State Assemblywoman Elizabeth Little.

Roll call vote resulted as follows:

Rich Hewlett, Councilman	Aye
Robert Prendergast, Councilman	Aye
Niki Baker, Councilwoman	Aye
Larry Bulman, Councilman	Aye
Harry G. Gutheil, Jr., Supervisor	Aye
