U.S. Environmental Protection Agency Reviews Cleanup at Chemical Control Corporation Superfund Site

The U.S. Environmental Protection Agency (EPA) is conducting its sixth five-year review of the **Chemical Control Corporation Superfund site**, located in Elizabeth, New Jersey. This review seeks to confirm that EPA's cleanup plan documented in the 1987 Record of Decision and implemented in 1994 by potentially responsible parties under EPA oversight remains protective of people's health and the environment. The cleanup plan included construction of a slurry wall around the site which solidified contaminated soil with cement within the slurry wall. The solidified soil was covered with clean gravel and graded. All the activities have been completed. EPA will continue to monitor the site to ensure the cleanup plan remains effective.

A summary of the five-year review activities and an evaluation of the long-term protectiveness of the cleanup will be included in the five-year review report, scheduled to be completed by **fall 2024**.

What is an EPA Five-Year Review?

The purpose of five-year reviews is to ensure that implemented cleanup plans at Superfund sites function as intended and continue to protect people's health and the environment. These regular reviews, which are required by federal law when contaminants remain at a site, include:

- Inspecting the site and cleanup technologies;
- Reviewing monitoring data, operating data, and maintenance records; and
- Determining if any new relevant regulatory requirements have been established since EPA's original cleanup decision was finalized.

When will EPA's Five-Year Review Report be available?

It is anticipated that the five-year review report will be available at the website noted below in **fall 2024**.

For more information

The Administrative Record, which includes EPA decision documents used for selecting the cleanup plan, is available for public review at the information repository listed below. Project information is also available online at the website noted below.
