**CC:**  
**Date Sent:** Monday, February 12, 2001 12:44 PM

Greetings All:

Attached to this E-mail is a ZIP file containing all the files that comprise the most recent version of the NYSDEC Hudson River Biota Database. Additions and changes made to the data since the January 2001 release are documented in the WordPerfect 8 file named "changes02-01.wpd". The data dictionary is the file named "DD.wpd". Additionally, I remembered to include the "variables.dbf" file that has information on codes and abbreviation used in the database. If you have any questions or comments please feel free to contact me.

I recently updated my distribution list with the most current information I have, but since I have no independent way to confirm that all parties actually receive these transmissions, I respectfully request that you all respond via E-mail and simply indicate if you've received the file successfully. Failure to do so will result in your name being deleted from the distribution list. To assure you that your name has not been removed from the list, I will confirm that I received your response.

Thank you,

Michael W. Kane
