

Topics for Joint Liaison Group Meeting

11/5/92

High Resolution Coring

Accuracy of radioactive dating technique

Comparison to archived cores

Documentation of sampling and storage of archived cores

Use of technique in a riverine system

Adequacy of Database

PCB Inventory

New fish sampling

Modelling Effects of Remediation

Future fish concentrations

Extent model has been specified to STC

Benefits of dredging

Utilization of Thomann report

---

topics not to be covered

Human Health Risk Assessment

Method for calculating from fish consumption

Uncertainty range

Reflection of actual risk

Monte Carlo method

Agricultural Impacts

Economic Impacts

Health Effects
