Reference: June 6 memo from Liaison Committee  
Chairs - Hudson River Reassessment

Dear Judy:

You've requested a response to the Scientific and Technical Committee's opinion, as summarized in Sharon Ruggi's notes, that new information about a PCB source in the Bakers Falls area should be incorporated into the total reassessment project.

I can't imagine on what grounds the EPA could possibly ignore the recommendation of its Scientific and Technical Committee on such a critical matter. I certainly hope the Citizen Liaison Groups will second the Committee's recommendation.

Sincerely,

*Eleanor*

*Note: the mailing from EPA was dated  
6-17 and I received it only yesterday.*
