

## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION II

JACOB K. JAVITS FEDERAL BUILDING

NEW YORK, NEW YORK 10278-0012

February 15, 1994

Dear Liaison Group Member:

Unfortunately, due to the severe weather that blanketed the area on February 8th and 9th, the U.S. Environmental Protection Agency, Region 2, had to postpone the Scientific & Technical Committee (STC) meeting that was scheduled for February 9, 1994 in Latham, New York. We apologize for any inconvenience this may have caused you.

Since the focus of that meeting was to be a discussion on modelling (an issue of great interest to the STC membership and others), EPA felt it would be neither prudent nor productive to hold the meeting without the fullest participation possible by the STC members. Another STC meeting on this subject will be held in the near future, and you will be notified of that meeting as soon as it is scheduled.

On another subject - while the deadline for submissions to River Voices has passed, we would like to have more contributions from the public. Remember, River Voices is your chance to share ideas and information pertinent to the Hudson River PCBs Reassessment not only with your fellow Liaison Group members, but with a very wide segment of the population outside that immediate spectrum (our mailing list numbers over 1500). Judging from the opinions so eloquently expressed in verbal form at our meetings, the Liaison Group members are rarely at a loss for words. Please put your thoughts into writing and send them to me in the next few weeks, and if you have any questions or need any information, give me a call at 212/264-7214. Thank you for your continued participation in the Community Interaction Program.

Best Wishes,

Ann Rychlenski, Community Relations Coordinator  
External Programs Division
