Re: Hudson River PCBs Site - Scientific and Technical Committee

Dear 2-

The U.S. Environmental Protection Agency (EPA) is proceeding with the Reassessment Remedial Investigation and Feasibility Study (Reassessment RI/FS) for the Hudson River PCBs site. TAMS Consultants, Inc., EPA's contractor for the Reassessment RI/FS, has prepared a draft Phase 1 Report and Phase 2A Sampling Plan which are undergoing internal review. EPA intends to release these documents in early July.

The Phase 2A Sampling Plan proposes sampling and analyses that need to be initiated this Summer or Fall. EPA believes that the input of the Scientific and Technical Committee (STC) is necessary before proceeding with the work proposed in the Phase 2A Sampling Plan. Therefore, a meeting of the STC is planned for Thursday, July 11, 1991, at 1:00 p.m. at the Holiday Inn in Latham to discuss the sampling plan. Directions to the Holiday Inn are attached.

EPA hopes to be able to provide members of the STC with a copy of the revised Phase 1 Report and Phase 2A Sampling Plan at the July 11th meeting. In order to hold meaningful discussions about the proposed sampling, a brief description of the work proposed in the Phase 2A Sampling Plan is attached.

If you have any questions, please contact me at (212) 264-7508.

Sincerely yours,

Douglas J. Tomchuk, Project Manager
Eastern New York/Caribbean Section II
