from Community Interaction Program Participants,
Hudson River PCBs Reassessment RI/FS**

Dear Ann:

Hope I'm not too late to submit this question for the proposed meeting of Scientific and Technical Committee members with the Liaison Groups.

Question: If the "remedial alternative" of dredging is decided upon following this current EPA study, what environmental benefits will the dredging accomplish?

Thanks for the opportunity to send questions in. The meeting should be an informative one--I just hope it doesn't coincide with jury duty, which I've just been called up for in early November.

Sincerely,

Eleanor F. Brown
