

# WATSON JOHNSON LANDFILL SUPERFUND SITE

**JULY 2016.** The U.S. Environmental Protection Agency (EPA) Watson Johnson Landfill Superfund Site cleanup team and its contractors have begun the well drilling operations for the in-situ treatment (groundwater) cleanup effort. You may see bulldozers and other trucks throughout this process. We plan to keep you updated of this work via our Facebook page. EPA will hold another public information session before the start of the landfill cleanup work.
