

EPA REVIEWS CLEANUP

Bendix Flight Systems Site

The U.S. Environmental Protection Agency (EPA) is conducting a Five-Year Review of the Bendix Flight Systems Superfund Site located in South Montrose, Bridgewater Township. EPA inspects sites regularly to ensure that cleanups conducted remain protective of public health and the environment. EPA's most recent review of the site in 2012 determined that the remedy is protective in the short-term, and that additional investigation and work will be conducted to ensure protectiveness in the long-term.

Findings from this review will be available September 2017.

To access the review, or to provide site-related information:
