

# EPA REVIEWS CLEANUP

## Tyler Refrigeration Site

The U.S. Environmental Protection Agency (EPA) is conducting a Five-Year Review of the Tyler Refrigeration Pit, a Superfund site located in Smyrna. EPA inspects sites regularly to ensure that cleanups conducted remain protective of public health and the environment. EPA's most recent review of the site in 2012 determined that the remedy continues to be fully protective of public health and the environment in the long-term.

**Findings from this review will be available September 2017.**

**To access the review, or to provide site-related information:**
