

NPL Site Narrative for Alpha Chemical Corp.

ALPHA CHEMICAL CORP. Galloway, Florida

Conditions at listing (October 1981): The Alpha Chemical Corp. Site covers about 40 acres near Galloway, Florida. A shallow well near the plant's production facility, which manufactures polyester resins, is contaminated with cadmium, chromium, and lead. This ground water is connected to the aquifer that supplies water to nearby communities. At the encouragement of the State, Alpha Chemical modified its process and upgraded its waste water treatment system to control most of its discharges.

Status (July 1983): The State is negotiating with Alpha Chemical for monitoring of ground water and for building a lined surface impoundment for its wastes.

For more information about the hazardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry (ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at [ATSDR - ToxFAQs](http://www.atsdr.cdc.gov/toxfaq/index.asp) (<http://www.atsdr.cdc.gov/toxfaq/index.asp>) or by telephone at 1-888-42-ATSDR or 1-888-422-8737.
