Case Narrative

Samples for the above noted Work Order were received on 05/18/2018. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Wet Chemistry:

Batch 118941, Method OXDMD_KMNO4_S, Samples 18051328-02C DUP2, -14C DUP3, and -16C DUP3: The RPDs between the samples and their duplicates were out of control. The corresponding sample result should be considered estimated.

Case Narrative

Samples for the above noted Work Order were received on 05/19/2018. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

Batch 118698, Method VOC_8260_S, Sample 18051407-07A MS/MSD: The MS/MSD recoveries were above the upper control limits for 2-Hexanone, Acetone, Tetrachloroethene, and Trichloroethene. The corresponding results in the parent sample may be biased high.

Batch 118698, Method VOC_8260_S, Sample 18051407-07A MSD: The RPDs between the MS and MSD were outside the control limits for multiple compounds per the QC report. The corresponding results in the parent sample should be considered estimated.

Batch R236669, Method VOC_8260_SLL, Sample 18051407-09A MS/MSD: The MS/MSD recoveries were above the upper control limits for multiple compounds per the QC report. The corresponding results in the parent sample were non-detect, therefore no qualification is required.

Batch R236669, Method VOC_8260_SLL, Sample 18051407-09A MS/MSD: The MS/MSD recoveries were below the lower control limits for multiple compounds per the QC report. The corresponding results in the parent sample may be biased low.

Batch R236723, Method VOC_8260_W, Sample VLCSW2-180527: The LCS recoveries were above the upper control limits for 1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane. All the sample results in the batch were non-detect. No qualification is required.

Case Narrative

Samples for the above noted Work Order were received on 05/19/2018. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

Batch 118698, Method VOC_8260_S, Sample 18051407-07A MS/MSD: The MS/MSD recoveries were above the upper control limits for 2-Hexanone, Acetone, Tetrachloroethene, and Trichloroethene. The corresponding results in the parent sample may be biased high.

Batch 118698, Method VOC_8260_S, Sample 18051407-07A MSD: The RPDs between the MS and MSD were outside the control limits for multiple compounds per the QC report. The corresponding results in the parent sample should be considered estimated.

Batch R236669, Method VOC_8260_SLL, Sample 18051407-09A MS/MSD: The MS/MSD recoveries were above the upper control limits for multiple compounds per the QC report. The corresponding results in the parent sample were non-detect, therefore no qualification is required.

Batch R236669, Method VOC_8260_SLL, Sample 18051407-09A MS/MSD: The MS/MSD recoveries were below the lower control limits for multiple compounds per the QC report. The corresponding results in the parent sample may be biased low.

Batch R236723, Method VOC_8260_W, Sample VLCSW2-180527: The LCS recoveries were above the upper control limits for 1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane. All the sample results in the batch were non-detect. No qualification is required.

Wet Chemistry:

Batch R236768, Method TOC_WBLK_S, Sample 18051407-07C MS/MSD: The MS/MSD recovery was below the lower control limit for TOC. The corresponding result in the parent sample may be biased low.

Batch 118941, Method OXDMD_KMNO4_S, Samples 18051407-04D DUP2, -04D DUP3, -08D DUP2, and -08D DUP3: The RPDs between the samples and the duplicates were out of control. The corresponding sample result should be considered estimated.

Case Narrative

Samples for the above noted Work Order were received on 05/23/2018. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.
