RE: Radiological Survey of Right-of-Way Utility Excavation
Permit Nos.: 1201805, 1107501 & 528499
Permit Address: 633 North Michigan Avenue
AECOM Project No. 60216198

Dear Mr. Nulsen:

Pursuant to conditions specified in a permit (see attached) issued by the City of Chicago, radiation monitoring was required to be performed at the above referenced site. AECOM Technical Services, Inc. (AECOM) provided the required radiation surveillance between the days of May 14, 2012 for an excavation to install a sewer and water line for the property located at 633 N. Michigan Ave.

Surveying was performed for the soil removed from a 4-foot by 12-foot trench excavation within the sidewalk along Michigan Avenue (See Sketch) to a depth of 5-feet below ground surface and extended with a 3.5-foot by 9-foot excavation within the sidewalk along Michigan to a depth of 5-feet below ground surface, required for a sewer and water line installation to the property located at 633 N. Michigan Ave. The monitoring revealed no indication of soils above the specified clean-up threshold established by the U. S. Environmental Protection Agency (USEPA) for the Streeterville area of Chicago. The USEPA threshold for Chicago's Streeterville area is 7.1 picocuries per gram (pCi/g total radium (Ra-226 + Ra-228)).

Gamma radiation count measurements for the project were made using Ludlum Model 2221 survey meter and an unshielded 2 x 2 NaI probe (Model 44-10). For the instrument used, the gamma count indicative of the 7.1 pCi/g threshold was 19,969 counts per minute (cpm) unshielded (7,127 cpm shielded). The field gamma background for the area was measured at approximately 5,000 cpm unshielded. The field gamma measurements within the excavation and the spoil materials generated during the excavation process did not exceed the respective threshold values previously stated and ranged from a minimum of 4,800 cpm to a maximum of 5,800 cpm unshielded. Thus, there was no indication of the presence of radiologically-contaminated material and/or an exceedance of the USEPA cleanup threshold of 7.1 pCi/g total radium.

As part of the permit conditions this letter has been forwarded to:

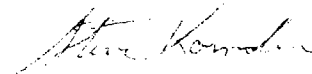

Chicago Department of Public Health

Conditions of Sewer Permits

1. Work performed under authority of this Permit shall be in accordance with the ordinances of the City of Chicago and the rules of the Department of Water Management.
2. Sewer permits are not licenses to make openings in the Public Street or parkway. Before making any opening in the street, parkways or sidewalk, a permit for such an opening must be obtained from the Bureau of Inspections of the Department of Transportation. The permit to make house drain repairs, to connect a sewer or drain to the City sewer, or to abandon a sewer line in the public way is not valid until the street opening permit has been obtained and is in the possession of the Sewer and Drain, or Wrecking Contractor's Foreman in charge of the work at the location in question.
3. Connections to the public sewers shall be made to junctions or as referenced in the latest edition of the Regulations for Sewer Construction and Stormwater Management - Permit and Fees handbook.
4. Work performed under this permit shall conform to the plans approved by the Department of Water Management. Field changes in the plans must be authorized by said Department.
5. The work authorized by this permit shall not be performed without prior notice to the Department of Water Management. Said notice is to be made 48 hours before said work. All sewer activity including but not limited to retrofits / driveways / televising / lining / seals / stubs / wrecking / abandonment require inspections. No building, structure - sewer line shall be installed, wrecked, demolished or abandoned without notification in writing to said Department.
6. Where sewers or drains are extended from stubs, the Sewer and Drain Contractor to whom this permit is issued must examine the existing sewer stubs in the presence of a sewer inspector. No connections shall be made to stubs unless they are in good, clean, clear, undamaged condition and approved for use by the Sewer Inspector.
7. Sizes and Grades of House Drains shall be in accordance with the City Municipal Code or as directed by the Department of Water Management. (Note: for foot prints of more than 15,000 square feet and open spaces of more than 7,500 square feet, the sizes shall be determined by the Department of Water Management's stormwater reviewers.)
8. In the event of an emergency, sewer repair work must be registered prior to commencement of work. A permit MUST be obtained no later than 24 hours from date of registration.
9. Permittee is responsible for following OSHA safety regulations and assumes all liability for work-related damages.

"Not valid unless receipted by the Department of Revenue City of Chicago. Permits and Deposits for Sewer work shall be void one (1) year from date of generation."

PERMIT OFFICE PHONES WILL BE OPEN DAILY: MONDAY-FRIDAY, (312) 744-3020/ (312) 744-3155. FOR REGISTRATION OF EMERGENCY WORK ON EVENINGS, WEEKENDS, AND HOLIDAYS, CALL: (312) 744-3155. FOR INSPECTIONS CALL: (312)744-5503(House Drain) / (312)744-5502(Mason)
