RE: Radiological Survey of Right-of-Way Utility Excavation
Permit No.: 170881215
Permit Address: 240 East Ontario Street
AECOM Project No. 60157647

Dear Mr. Prasad:

Pursuant to conditions specified in a permit (see attached) issued by the City of Chicago, radiation monitoring was required to be performed at the above referenced site. AECOM Technical Services, Inc. (AECOM) provided the required radiation surveillance on August 31, 2011 for the excavation of a trench for the decommissioning of a gas main and service connection.

Surveying was performed for the asphalt, concrete, and soil removal of a 3-foot by 3-foot (to a depth of 3-feet) square excavation required for the decommissioning of the gas main and connection. The monitoring revealed no indication of soils above the specified clean-up threshold established by the U. S. Environmental Protection Agency (USEPA) for the Streeterville area of Chicago. The USEPA threshold for Chicago's Streeterville area is 7.1 picocuries per gram (pCi/g total radium (Ra-226 + Ra-228)). Gamma radiation count measurements for the project were made using Ludlum Model 2221 survey meter and an unshielded 2 x 2 NaI probe (Model 44-10).

For the instrument used, the gamma count indicative of the 7.1 pCi/g threshold was 18,771 counts per minute (cpm) unshielded (7,122 cpm shielded). The unshielded field gamma measurements within the excavation and the spoil materials generated during the excavation process did not exceed the respective threshold values previously stated and ranged from a minimum of 7,500 cpm to a maximum of 8,100 cpm. Thus, there was no indication of the presence of radiologically-impacted material and/or an exceedance of the USEPA cleanup threshold of 7.1 pCi/g total radium.

Finally, as part of the permit conditions, this letter has been forwarded to:

Chicago Department of Environment
Attention: Ms. Rahmat Begum
30 North LaSalle Street, 25th Floor
Chicago, Illinois 60602

Please contact us with any questions you have regarding this letter or the reported results.

Regards,

Brian R. Schmidt

**CITY OF CHICAGO DEPARTMENT OF ENVIRONMENT
FORM NO. DOE.ROW.03**

Notice is hereby given that the site you have requested a permit for is recorded with the City of Chicago Department of Environment as potentially having environmental contamination on the site and adjacent right-of-way. This environmental contamination could present a threat to human health and safety in connection with work performed at the site, or in the adjacent right-of-way, if proper safeguards are not employed.

A file containing detailed information regarding the aforementioned environmental contamination is available for review at the Department of Environment at 33 N. LaSalle St., Suite LL-120, Chicago, Illinois 60602 during normal business hours (8:30AM-4:30PM, Monday through Friday). Contact (312) 744-7606 for an appointment. This file must be reviewed and the remainder of this form completed before the permit can be issued if the ground is exposed or excavated. Please note that for some locations, additional health and safety procedures may be required by law.

Please complete the following:

I have reviewed and understand the documents, maintained by the Department of Environment, regarding environmental contamination of the site and adjacent right-of-way. Further, I will ensure that all work at the subject site and adjacent right-of-way, and any monitoring required including but not limited to radiation monitoring, will be performed in a manner that is protective of human health and the environment and in compliance with all applicable local, state, and federal laws, rules, and regulations, especially those pertaining to worker safety and waste management. I will ensure that the results of any radiation monitoring and/or surveying conducted shall be provided to the Department of Environment and the United States Environmental Protection Agency within two (2) weeks of their completion. If any elevated levels of radioactive material are detected, I will immediately contact the United States Environmental Protection Agency at (800) 424-8802.

Authorization/Change Request

Project No: 60157647

Client: Integrys (PO No. 6600004136)

Task No:	9
Rev No:	12
Issue Date:	9/28/2011

Change Description

Type of Change:	Scope – new location
Proposed Change:	Provide radiological screening on a time and materials basis for excavation activities in the ROW at: 1) 143 E. Ontario for cut-off, 2) 451 E. Ohio for a new service installation, 3) 208 E. Grand Ave for installation of corrosion protection; 4) 633 N Saint Clair for corrosion protection, and 5) 164-67 E. for corrosion protection.

Reason for Proposed Change: Client request

Detailed Description of Proposed Change: Perform radiological screening for utility excavation at above referenced address per CDOE permits (to be provided by client).

Task Approach: Radiological screening in the ROW for utility excavation. The estimated time to complete as provided by client is less than 1-day.

Deliverables: Individual results reports including permit and sketch which will be sent to client, CDOE and USEPA for each of the above referenced sites.

Assumptions: AECOM will complete the field work based on a time and materials (T&M) basis and the agreed terms and conditions (MSA 06R-0052-RJW dated May 9, 2006).

Task Duration and Schedule: Complete within 30-days of authorization

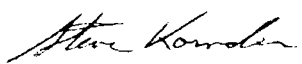

Cost Change

Labor Cost:	
Radiation Technician (40 hrs @ \$85/hour)	\$3400
Equipment Rental (5 @ \$75/day)	\$375
Vehicle Trip Charge (5 @ \$50/day)	\$250
Five Summary Letter Reports & Project Management	\$2,500
Estimated Budget	\$6,525

Change Summary (or new cost for new task)

	Labor	ODC	Expenses	Total
Current Authorization (Project)	\$15,660	\$1,115	0	\$16,775
Proposed Change with this Authorization	\$5,900	\$625	0	\$ 6,525
Project Total including Change	\$21,560	\$1,740	0	\$23,300

Authorization to Proceed

Client Representative Name/signature:	Title:	Authorization Date:
