

NPL Site Narrative for Delavan Municipal Well #4

DELAVAN MUNICIPAL WELL #4 Delavan, Wisconsin

Conditions at listing (September 1983): Municipal Well No. 4 supplying Delavan, Walworth County, Wisconsin, is contaminated with traces of trichloroethylene and smaller amounts of three other solvents. The city closed the well in July 1982, when it discovered the contamination. Sta-Rite Industries, located less than 2 miles from the well, is working with the city to determine if the contamination may come from a buried tank in which the company formerly stored waste solvents.

Status (June 1984): EPA is considering various alternatives for the site.

For more information about the hazardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry (ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at [ATSDR - ToxFAQs](http://www.atsdr.cdc.gov/toxfaqs/index.asp) (<http://www.atsdr.cdc.gov/toxfaqs/index.asp>) or by telephone at 1-888-42-ATSDR or 1-888-422-8737.
