RE: Radiological Survey of Right-of-Way Utility Excavation
Permit No.: DOT796818
Permit Address: 535 E. St. Claire St., Chicago, IL
AECOM Project No. 60537484

Dear Mr. Seibel:

Pursuant to conditions specified in the Chicago Department of Public Health (CDPH) radiation monitoring was required to be performed at the above referenced site. AECOM Technical Services, Inc. (AECOM) provided the required radiation monitoring on May 24 and 25, 2017, to screen the exposed fill during the installation of a cellular light pole base replacement and associated utility trench excavations.

Gamma radiation surveying was conducted at the above referenced address during the concrete/asphalt removal and trench excavation in the sidewalk and roadway Right-of-Way (ROW). The excavation consisted of removal of existing light pole base, concrete sidewalk, curb, and roadway as well as disturbance of the fill material during these activities. The work area is located along the north side of E. Ohio St., east of the intersection of E. Ohio St. and N. St. Claire St. (see sketch). The trench excavation was approximately 25-feet long, 2 to 3-feet wide. The excavation disturbed fill to depths of 3 to 8.5-feet below ground surface (bgs).

The U.S. Environmental Protection Agency (USEPA) removal action level for Chicago's Streeterville area is 7.1 picocuries per gram (pCi/g) total radium (Ra-226 + Ra-228). Gamma radiation count measurements for the project were made using a Ludlum Model 2221 survey meter (SN 172039) and an unshielded 2 x 2 inch sodium iodide (NaI) probe Model 44-10. For the instruments used, the gamma count indicative of the USEPA removal action level of 7.1 pCi/g were 19,416 counts per minute (cpm) unshielded and 6,175 cpm shielded.

The field instrument gamma background for the outside of the area was not recorded because there was an absence of comparable locations. However, values identified immediately after removal of the roadway were sufficient to establish a background value of 5,200 to 6,200 cpm. Although none were observed for this project, field gamma measurements greater than twice the field background represent potential anomalous results that require more cautious and frequent field screening, but are not necessarily indications of the presence of thorium contaminated fill soil.

The field gamma measurements within the excavation area and of the spoil materials generated during the excavation process did not exceed the field instrument threshold equivalent to the USEPA removal action level and ranged from a minimum of 3,800 cpm to a maximum of 10,000 cpm unshielded. Thus, there was no indication of the presence of radiologically-contaminated fill soil and/or an exceedance of the USEPA removal action level of 7.1 pCi/g total radium.

To fulfill the requirement of the CPDH permit this letter has been forwarded via email to:

PERMIT

DEPARTMENT OF PUBLIC HEALTH
CITY OF CHICAGO

(STREETERVILLE Right-of-Way)

Notice is hereby given that the site you have requested a permit for is recorded with the City of Chicago Department of Public Health (CDPH) as potentially having environmental contamination on the site and adjacent right-of-way. This environmental contamination could present a threat to human health and safety in connection with work performed at the site, or in the adjacent right-of-way, if proper safeguards are not employed.

A file containing detailed information regarding the aforementioned environmental contamination is available for review at CDPH at 333 S. State St., Room 200, Chicago, Illinois 60604 during normal business hours (8:30AM-4:30PM, Monday through Friday). Contact (312) 745-3152 for an appointment. This file must be reviewed and the remainder of this form completed before the permit can be issued if the ground is exposed or excavated. **Please note that for some locations, additional health and safety procedures may be required by law.**

Please complete the following:

I have reviewed and understand the documents, maintained by CDPH, regarding environmental contamination of the site and adjacent right-of-way. Further, I will ensure that all work at the subject site and adjacent right-of-way, and any monitoring required including but not limited to radiation monitoring, will be performed in a manner that is protective of human health and the environment and in compliance with all applicable local, state, and federal laws, rules, and regulations, especially those pertaining to worker safety and waste management. I will ensure that the results of any radiation monitoring and/or surveying conducted shall be provided to the CDPH and the United States Environmental Protection Agency **within two (2) weeks of their completion**. If any elevated levels of radioactive material are detected, I will immediately contact the United States Environmental Protection Agency at (800) 424-8802.

Applicant Name (print): Robert J. Wilson

Signature: 

Site Address and Work Location (Describe exact site location and attach map):

535 N. St. Clair (see attached construction drawings)

Nature of Work: Attach small cell wireless equipment to replacement light pole.

Please return this completed form to the Chicago Department of Transportation, Division of Infrastructure Management, Public Way Permit Office, City Hall - Room 905, 121 N. LaSalle St., Chicago, Illinois 60602 during normal business hours (8:30 AM - 4:30 PM, Monday through Friday)

For CDPH Use Only

SKETCH

NOTES:
THE FULL PERIMETER OF THE ASPHALT RESTORATION LIMITS SHALL BE SEALED COMPLETELY AT THE EDGE OF THE CUT SMOOTHING IRON OR BY MEANS OF INFRARED TREATMENT TO PREVENT WATER SEEPAGE INTO THE PAVEMENT, UNLESS OTHERWISE DIRECTED BY THE COMMISSIONER.

LEGEND

-  UTILITY TRENCH OR UTILITY/STREET CUT WITHIN THIS ZONE
-  CITY STANDARD FOR CONCRETE SIDEWALK RESTORATION
-  CITY STANDARD FOR ASPHALT RESTORATION

UTILITY NOTES:
*USE EXTREME CAUTION NEAR COMED FACILITIES. HAND DIG WHILE CROSSING 69/138/345 KV TRANSMISSION LINE. COMED TRANSMISSION SHALL BE NOTIFIED 2 BUSINESS DAYS PRIOR TO THE START OF WORK. TO SCHEDULE AN ONSITE INSPECTION DURING CONSTRUCTION, CONTACT LESLIE PASCHAL AT (630) 437-4767.

HAND EXCAVATION IS REQUIRED TO FIELD VERIFY THE HORIZONTAL AND VERTICAL LOCATION OF THE 24-INCH WATER MAIN PRIOR TO CROSSING. A MINIMUM OF 4 FEET OF UNDISTURBED SOIL IS TO REMAIN ON EITHER SIDE OF THIS EXISTING FEEDER MAIN. EXTREME CAUTION MUST BE TAKEN TO AVOID DAMAGE TO THESE WATER FACILITIES. IF ANY DAMAGE OCCURS TO THIS DEPARTMENT'S FACILITIES THE CONTRACTOR AND/OR OWNER WILL BE RESPONSIBLE FOR THE COST OF REPAIRING OR REPLACING THE DAMAGED FACILITIES.
