RE: Emergency Excavation – Conduit Blockage
Permit No.: Emergency Dig No. 600485719 and DOT977347
Permit Address: 555-599 N. Michigan Ave., Chicago, Illinois
AECOM Project No. 60493426

Dear Mr. Bulthaup:

Radiation monitoring was required to be performed at the above referenced site pursuant to the City and United States Environmental Protection Agency (USEPA) requirements for excavation with the Streeterville Thorium Area (see attached dig ticket issued by the City of Chicago). AECOM Technical Services, Inc. (AECOM) provided the required radiation surveillance on July 7 and 8, 2018 for emergency excavation activities necessary to remove a conduit blockage in order to restore a service. Work was initiated at 10PM on July 7 and completed in the early morning of July 8, 2018. A CDOT permit (DOT977347) was required to restore the pavement. However, thorium screening was not required because no additional excavation was necessary to complete the restoration activities.

Surveying was performed on the fill material exposed beneath the concrete roadway and sidewalk at 555-599 N. Michigan Ave. (refer to sketch) during an excavation work. The work consisted of removal of portions of the existing roadway and sidewalk as well as related fill utilizing an excavator. The excavation consisted of a single trench approximately 11-feet long, 5-feet wide, which was excavated to a depth of 2.5-feet below the pavement surface. Surveying was completed on the exposed fill during the excavations. Refer to the attached sketch for the dimensions and location of the excavation.

The monitoring did not indicate that the disturbed fill soil was above the removal action level established by the USEPA for the Streeterville area of Chicago. The USEPA removal action level for Chicago's Streeterville area is 7.1 picocuries per gram (pCi/g) total radium (Ra-226 + Ra-228). Gamma radiation count measurements for the project were recorded using Ludlum Models 2221 survey meter and an shielded 2 x 2 inch NaI probe (Model 44-10). For the instrument used, the gamma count threshold indicative of the 7.1 pCi/g removal action level is 7,374 (S/N: 172039) counts per minute (cpm) shielded. A field instrument background gamma count level was recorded at the nearby planter with readings ranging between 1,800 to 2,400 cpm.

The field gamma measurements within the excavation did not exceed the instrument threshold previously stated and ranged from a minimum of 1,100 cpm to a maximum of 2,200 cpm shielded. The lithology consisted predominantly of clean fill (1-inch stone with fines) and minimal amount of urban fill. Based on field observations there was no indication of the presence of radiologically-contaminated fill and/or an exceedance of the USEPA removal action level of 7.1 pCi/g total radium. Copies of the emergency dig and restoration permits, excavation sketch and gamma survey results have been included as attachments.

Permit Nos.: Emergency Dig No. 600485719 and DOT977347
Permit Address: 465 N. Park Ave.

DEPARTMENT OF PUBLIC HEALTH
CITY OF CHICAGO

(STREETERVILLE Right-of-Way)

Notice is hereby given that the site you have requested a permit for is recorded with the City of Chicago Department of Public Health (CDPH) as potentially having environmental contamination on the site and adjacent right-of way.

A file containing detailed information regarding the aforementioned environmental contamination is available for review at CDPH at 333 S. State St., Room 200, Chicago, Illinois 60604 during normal business hours (8:30AM-4:30PM, Monday through Friday).

Please complete the following:

I have reviewed and understand the documents, maintained by CDPH, regarding environmental contamination of the site and adjacent right-of-way. Further, I will ensure that all work at the subject site and adjacent right-of-way, and any monitoring required including but not limited to radiation monitoring, will be performed in a manner that is protective of human health and the environment and in compliance with all applicable local, state, and federal laws, rules, and regulations, especially those pertaining to worker safety and waste management.

Restrictions:

1. Contractor must notify 811 Chicago at 312-744-7000 no less than 48 hours (exclusive of Saturdays, Sundays and Holidays) but no more than 14 calendar days in advance of the start of the excavation or demolition, unless the excavation date was provided with the application and remains unchanged. Prior to 26 calendar days the Contractor must notify 811 Chicago to renewal the dig date! It is the Excavator's responsibility to request refreshing of marks when needed, but no longer than 28 calendar days after the last requested date. When applicable, all excavation areas are to be clearly marked in safety white paint prior to calling 811 Chicago. White paint is not required for joint meets or emergency work. Excavators requesting dig tickets are responsible for the protection of utility markings at the job site. Any markings of underground utilities utilizing utility colors must be done by facility owners or authorized agents only.
2. A copy of the permit must remain on-site for inspector's review.
3. All work shall be in accordance with CDOT Rules and Regulations for Construction in the Public Way and City of Chicago Municipal Code. Work to be performed as per plans and specifications. All traffic control will be the responsibility of the contractor, and must comply with all CDOT and MUTCD standards.
4. Permittee must provide a sign which identifies the telephone number and company or person performing the work. Signage may be affixed to barricades.
5. Contractor must secure plating over all openings in the roadway and secure all sidewalk/parkway openings during non-working hours until such time when the road surface is restored.
6. No work in or use of the public right of way is to be done when a special event is taking place. It is up to the applicant to determine if an event is scheduled. To obtain a listing of programs or events within the City of Chicago please dial 311 when you are within the City boundaries.
7. Start Time no Earlier than 10:00pm End Time no Later than 6:00am Sunday through Thursday

Per Mike Simon this is Ok to release
