

NPL Site Narrative for AT & SF (Clovis)

AT & SF (CLOVIS) Clovis, New Mexico

Conditions at listing (October 1981): The Atchison, Topeka, and Santa Fe Railway (AT&SF) has conducted switchyard and car repair activities in Clovis, New Mexico, since the early 1900s. Activities over the past 30 years have included washing of hopper cars and refueling of locomotives. Waste water from the various operations discharges to a nearby playa lake, a potential source of contamination of the underlying aquifer. In addition, diesel oil from fueling operations at the site has been found atop the aquifer, which supplies drinking water to Clovis.

Status (July 1983): EPA has requested that the company determine the extent of contamination at the site and develop any needed remedial program.

For more information about the hazardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry (ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at [ATSDR - ToxFAQs](http://www.atsdr.cdc.gov/toxfaqs/index.asp) (<http://www.atsdr.cdc.gov/toxfaqs/index.asp>) or by telephone at 1-888-42-ATSDR or 1-888-422-8737.
