Report Distribution

Referred To

DNR - Southwest Regional Office
DNR - Hazardous Waste Program

Additional Information

The Empire Bank is considering foreclosing on a property located at 933 West Chase in Springfield. The property is a closed commercial facility formerly known as Kamtel, Inc. (owned by Ratibhai Patel) - reportedly a circuit board manufacturer. The business has declared bankruptcy. Empire Bank had a Phase II assessment completed which found elevated levels of metals in the soil at the site. Empire Bank is considering whether they can disclose the actual levels to DNR, which has requested the data. For now, they simply want to report "elevated levels".

Update 11/15/11: Empire Bank forwarded an electronic copy of the Phase II report, part of which is attached to this report. The contaminants that were found to be elevated in one soil boring and associated groundwater at the site, compared to MRBCA non-petroleum site Default Target Levels, are: Ammonia, Arsenic, Chromium, Copper, Lead, and Selenium.

The information in this report is reported to DNR by outside parties. The fact that a release or spill has been reported does not necessarily mean that there has been a release or spill, or that a site is contaminated. Information in this report may be updated from time to time. For a complete copy of the file, please contact the Custodian of Records for the Environmental Services Program at (573) 526-3349.
