About the Administrative Record

This administrative record file contains the documents that the U.S. Environmental Protection Agency (EPA) is currently using to identify appropriate remedial activities for the McColl Superfund site, Groundwater Operable Unit in Fullerton, California. It is presented in Compact Disk (CD). The administrative record has been added to as documents have become available. The administrative record supports the Record of Decision (ROD) to address contaminated groundwater, dated May 9, 1996. The ROD document includes EPA's Proposed Plan, public comments on the Proposed Plan, and EPA's Response to comments.

This administrative record file also includes by reference the documents in the *McColl Superfund Site, Source/Soil Operable Unit Administrative Record, November, 1988*, with updates in December 1991, August 1992, and June 1993.

EPA welcomes questions and comments on documents contained in the administrative record file. Please contact:

What is an Administrative Record?

An administrative record is a collection of documents which forms the basis for an agency's decision, in this case the selection of a response action at a Superfund site. This does not mean that only documents which support a response decision are placed in the administrative record. Relevant documents that were relied upon in selecting the response action, as well as relevant documents that were considered but ultimately rejected, are included. The administrative record also acts as a vehicle for public participation in selecting a response action.

Under section 113(K) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act (SARA), the U.S. Environmental Protection Agency (EPA) is required to establish an administrative record for every Superfund response action and to make a copy of the administrative record available at or near the site. The administrative record must be reasonably available for public review during normal business hours and should be treated as a non-circulating reference document. Questions regarding the maintenance of the administrative record file should be directed to:

Elaine Chan, Administrative Record Coordinator, U.S. EPA (SFD-7-B), 75 Hawthorne Street, San Francisco, CA 94105-3901, Phone: (415) 972-3128

How to obtain copies of administrative record documents:

Individuals may copy any documents contained in the administrative record file according to the procedures at the local repository or request a copy of the CD by calling the Superfund Records Center at (415) 536-2000.
