ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-45. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Future Resident who Consumes Whitefish

	Total HI Across COPCs by Pathway																	Total HI Across Pathways																
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-46. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Future Resident who Consumes Burbot

	Total HI Across COPCs by Pathway																	Total HI Across Pathways															
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System															
Target Organ System:	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-47. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Future Resident who Consumes Kokanee

	Total HI Across COPCs by Pathway																	Total HI Across Pathways															
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System															
Target Organ System:	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-52. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Future Resident who Consumes Sucker

	Total HI Across COPCs by Pathway																	Total HI Across Pathways															
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System															
Target Organ System:	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-53. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Future Resident who Consumes Walleye

	Total HI Across COPCs by Pathway																	Total HI Across Pathways																
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-54. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Future Resident who Consumes Whitefish

	Total HI Across COPCs by Pathway																	Total HI Across Pathways															
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System															
Target Organ System:	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

-- = no toxicity value available ND = not detected NA = not analyzed

(a) Some samples were not analyzed for inorganic arsenic For these samples, a calculated inorganic arsenic result was generated by multiplying the total arsenic result by the site-specific fraction (5 5%) of inorganic arsenic to total arsenic

(b) Based on toxicity values for Chromium (VI)

(c) Assumes chemical form of mercury in tissue is methylmercury

(d) Non-dioxin-like component evaluated based on Aroclor

(e) Non-dioxin-like component evaluated based on sum of non-dioxin-like congeners

(f) When calculating total HQs from PCBs, the HQ was set equal to max of the Aroclor HQ or PCB congener sum HQ

(g) When calculating total cancer risks from non-dioxin-like PCBs, the non-dioxin-like risk was set equal to max of the Aroclor risk or congener sum risk

(h) oRfD based on Aroclor-1254; oSF based on high risk and persistence tier (see Tables 4-2 and 4-4)

-- = no toxicity value available ND = not detected NA = not analyzed

(a) Some samples were not analyzed for inorganic arsenic For these samples, a calculated inorganic arsenic result was generated by multiplying the total arsenic result by the site-specific fraction (5 5%) of inorganic arsenic to total arsenic

(b) Based on toxicity values for Chromium (VI)

(c) Assumes chemical form of mercury in tissue is methylmercury

(d) Non-dioxin-like component evaluated based on Aroclor

(e) Non-dioxin-like component evaluated based on sum of non-dioxin-like congeners

(f) When calculating total HQs from PCBs, the HQ was set equal to max of the Aroclor HQ or PCB congener sum HQ

(g) When calculating total cancer risks from non-dioxin-like PCBs, the non-dioxin-like risk was set equal to max of the Aroclor risk or congener sum risk

(h) oRfD based on Aroclor-1254; oSF based on high risk and persistence tier (see Tables 4-2 and 4-4)

-- = no toxicity value available ND = not detected NA = not analyzed

(a) Some samples were not analyzed for inorganic arsenic For these samples, a calculated inorganic arsenic result was generated by multiplying the total arsenic result by the site-specific fraction (5 5%) of inorganic arsenic to total arsenic

(b) Based on toxicity values for Chromium (VI)

(c) Assumes chemical form of mercury in tissue is methylmercury

(d) Non-dioxin-like component evaluated based on Aroclor

(e) Non-dioxin-like component evaluated based on sum of non-dioxin-like congeners

(f) When calculating total HQs from PCBs, the HQ was set equal to max of the Aroclor HQ or PCB congener sum HQ

(g) When calculating total cancer risks from non-dioxin-like PCBs, the non-dioxin-like risk was set equal to max of the Aroclor risk or congener sum risk

(h) oRfD based on Aroclor-1254; oSF based on high risk and persistence tier (see Tables 4-2 and 4-4)

(a) Some samples were not analyzed for inorganic arsenic For these samples, a calculated inorganic arsenic result was generated by multiplying the total arsenic result by the site-specific fraction (5 5%) of inorganic arsenic to total arsenic

(b) Based on toxicity values for Chromium (VI)

(c) Assumes chemical form of mercury in tissue is methylmercury

(d) Non-dioxin-like component evaluated based on Aroclor

(e) Non-dioxin-like component evaluated based on sum of non-dioxin-like congeners

(f) When calculating total HQs from PCBs, the HQ was set equal to max of the Aroclor HQ or PCB congener sum HQ

(g) When calculating total cancer risks from non-dioxin-like PCBs, the non-dioxin-like risk was set equal to max of the Aroclor risk or congener sum risk

(h) oRfD based on Aroclor-1254; oSF based on high risk and persistence tier (see Tables 4-2 and 4-4)

(a) Some samples were not analyzed for inorganic arsenic For these samples, a calculated inorganic arsenic result was generated by multiplying the total arsenic result by the site-specific fraction (5 5%) of inorganic arsenic to total arsenic

(b) Based on toxicity values for Chromium (VI)

(c) Assumes chemical form of mercury in tissue is methylmercury

(d) Non-dioxin-like component evaluated based on Aroclor

(e) Non-dioxin-like component evaluated based on sum of non-dioxin-like congeners

(f) When calculating total HQs from PCBs, the HQ was set equal to max of the Aroclor HQ or PCB congener sum HQ

(g) When calculating total cancer risks from non-dioxin-like PCBs, the non-dioxin-like risk was set equal to max of the Aroclor risk or congener sum risk

(h) oRfD based on Aroclor-1254; oSF based on high risk and persistence tier (see Tables 4-2 and 4-4)

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

Table 5-169. Cancer Risks by ADA for the Future Resident who Consumes Kokanee

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

Table 5-171. Cancer Risks by ADA for the Future Resident who Consumes Rainbow Trout

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

Table 5-173. Cancer Risks by ADA for the Future Resident who Consumes Sturgeon

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

Table 5-174. Cancer Risks by ADA for the Future Resident who Consumes Sucker

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

Table 5-175. Cancer Risks by ADA for the Future Resident who Consumes Walleye

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

ND = not detected

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]Cancer benchmark is HI≥1e-04.

Table 5-177. Non-Cancer Target Organ System Hazards and Cancer Risk for Non-Lead COPCs for the RME: Outdoor Worker
