ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-18. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Current Resident who Consumes Rainbow Trout

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-19. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Current Resident who Consumes Smallmouth Bass

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																	
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**																	
Target Organ System:		*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*		*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin Hair & Nails*	*Urinary*

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-20. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Current Resident who Consumes Sturgeon

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																	
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-21. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Current Resident who Consumes Sucker

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-22. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Current Resident who Consumes Walleye

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-23. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Current Resident who Consumes Whitefish

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-24. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Burbot

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																	
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-25. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Kokanee

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-26. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Northern Pike

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																	
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-27. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Rainbow Trout

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																	
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-28. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Smallmouth Bass

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-29. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Sturgeon

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-30. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Sucker

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																	
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**																	
Target Organ System:		*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*		*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*	*Cardiovascular*	*Developmental*	*Endocrine*	*Gastrointestinal*	*Hematologic*	*Nervous*	*Reproductive*	*Skin, Hair & Nails*	*Urinary*

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-31. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Walleye

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

Table 5-32. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the CTE: Current Resident who Consumes Whitefish

		Total HI Across COPCs by Pathway																			**Total HI Across Pathways**																	
		Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																			**By Target Organ System**

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]TCRA or VRA taken at this DU. The maximum backfill concentration from either the 2015 TCRA Final Completion Report or the 2017-2018 VRA Draft Completion Report is used as the EPC.

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-40. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Future Resident who Consumes Rainbow Trout

	Total HI Across COPCs by Pathway																	Total HI Across Pathways															
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

Table 5-41. Non-Cancer Target Organ System Hazards for Non-Lead COPCs for the RME: Future Resident who Consumes Smallmouth Bass

	Total HI Across COPCs by Pathway																	Total HI Across Pathways																
	Ingestion (Fish), Incidental Ingestion & Dermal (Soil) or Inhalation (Air) - by Target Organ System																	By Target Organ System

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.

ND = not detected; NA = not analyzed; -- = target organ system not affected by COPCs in this media

[a]Dust was only evaluated in the ingestion pathway. Dermal contact was only evaluated for soil.

[b]EPC used in risk calculations was the 95UCL across all species sampled

[c]Non-cancer benchmark is HI>1.
