

## CLEANUP AND REDEVELOPMENT OF REMOVAL ACTION SITES IN THE KANSAS CITY METROPOLITAN AREA

Each year, thousands of emergencies involving hazardous substances are reported in the United States. Emergencies range from small-scale spills to large incidents requiring prompt actions and evacuation of nearby populations. In response to these emergencies, EPA conducts short-term cleanups – called removal actions – to protect human health and the environment. This webinar will highlight EPA’s involvement at removal action sites and examples of successful removal action site redevelopment in the Kansas City metropolitan area. The webinar will share lessons learned and information for those interested in Superfund site reuse and commercial, residential, agricultural and industrial redevelopment.

### PRESENTERS:

Frank Avvisato, EPA Superfund Redevelopment  
Tonya Howell, EPA Region 7 Superfund  
Redevelopment Coordinator  
Andrew Gieseke, EPA On-Scene Coordinator

### WHEN:

FRIDAY, JUNE 12TH, 2020  
2:00 P.M. TO 3:30 P.M. (EDT)
