

## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

WASHINGTON, D.C. 20460

April 11, 2023

OFFICE OF THE  
CHIEF FINANCIAL OFFICER

The Honorable Mike Simpson  
Chairman, Subcommittee on Interior,  
Environment, and Related Agencies  
Committee on Appropriations  
House of Representatives  
Washington, D.C. 20515

The Honorable Chellie Pingree  
Ranking Member, Subcommittee on Interior,  
Environment, and Related Agencies  
Committee on Appropriations  
House of Representatives  
Washington, D.C. 20515

The Honorable Jeff Merkley  
Chair, Subcommittee on Interior,  
Environment, and Related Agencies  
Committee on Appropriations  
United States Senate  
Washington, D.C. 20510

The Honorable Lisa Murkowski  
Ranking Member, Subcommittee on Interior,  
Environment, and Related Agencies  
Committee on Appropriations  
United States Senate  
Washington, D.C. 20510

Dear Chairman, Chair, and Ranking Members:

Enclosed is the U.S. Environmental Protection Agency's Fiscal Year 2022 report to Congress on the status of Superfund projects funded by the Infrastructure Investment and Jobs Act (Public Law 117-58). The IIJA instructed the EPA to provide annual reports, specifically:

...Provided further, That the Administrator of the Environmental Protection Agency shall annually report to Congress on the status of funded projects....

The agency appreciates Congressional interest and support of its Superfund Remedial Program. The EPA looks forward to working with Congress to advance important cleanup work at Superfund National Priorities List sites across the United States.

If you have further questions or would like to set up a meeting to discuss this report, please contact Ed Walsh at (202) 564-4594 or [walsh.ed@epa.gov](mailto:walsh.ed@epa.gov).

Sincerely,

Amin, Faisal

Digitally signed by Amin,  
Faisal

Faisal Amin  
Chief Financial Officer

Enclosure

## FISCAL YEAR 2022 REPORT TO CONGRESS

### Superfund Sites with Projects Funded with Infrastructure Investment and Jobs Act Funds

#### BACKGROUND

The Infrastructure Investment and Jobs Act (IIJA) of 2021 [also referred to as the Bipartisan Infrastructure Law (BIL)], signed into law on November 15, 2021, provided \$3.5 billion for the Superfund Remedial program, waived the cost share required by states for remedial action projects at Superfund sites, and directed EPA to annually report to Congress on the status of funded projects.<sup>1</sup> Most of the \$3.5 billion is dedicated to EPA-financed remedial action construction projects at non-Federal National Priorities List (NPL) sites. EPA is using infrastructure funds to clear the backlog of 49 sites<sup>2</sup> with previously unfunded construction projects as of FY 2022, start additional new construction projects when they are ready, and accelerate ongoing cleanups at NPL sites where no other sources of funding are available. Since passage of the law, EPA has been identifying NPL sites to receive funding and using the investment to ensure communities living near many of the most serious uncontrolled or abandoned releases of contamination get the protections they deserve.

#### SITES WITH PROJECTS FUNDED BY BIL IN FY 2022

In FY 2022, EPA obligated approximately \$1.0 billion for extramural work at 116 Superfund sites on the NPL.<sup>3</sup> This includes:

- Approximately \$772 million at 74 NPL sites in communities with the potential for environmental justice concerns, according to data from EJSCREEN.
- Almost \$240 million at 14 NPL sites with Native American Interest. (Native American Interest indicates that one or more Indian tribe is directly or indirectly affected by a potential or known release at that site.)

This report provides a list of the Superfund NPL sites that received BIL funding in FY 2022. Table 1 provides the amount of BIL funds obligated in FY 2022 by region and state or territory. Table 2 provides a list of sites with construction projects funded either in whole or part with BIL funds in FY 2022. Each site name is hyperlinked to its site profile page where more information can be found on the status of cleanup for that site.

It is important to note that while BIL funds were obligated in FY 2022 for construction projects in order to maximize the waiver of cost share for states required by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), a significant amount of work occurred using annually appropriated funds for pre-construction activities at sites across the country, including remedial investigations, remedial designs to prepare sites for remedial action

---

<sup>1</sup> For more information, please see, page 970: <https://www.congress.gov/117/plaws/publ58/PLAW-117publ58.pdf>.

<sup>2</sup> For more information, please see: <https://www.epa.gov/superfund/superfund-sites-new-construction-projects-receive-bipartisan-infrastructure-law-funding>.

<sup>3</sup> Excludes amounts obligated and/or disbursed for management and oversight program activities and intramural costs such as payroll and travel.

construction, technical assistance, laboratory analysis, community involvement and cooperative agreements for state, tribal, and local government participation in the cleanup process. BIL funding allowed Superfund NPL sites across the country to move forward with important cleanup work, either directly with BIL funding or indirectly by making more annually appropriated funding available for pre-construction activities.
