HOW SUPERFUND REDEVELOPMENT IN THE MID-ATLANTIC REGION IS MAKING A DIFFERENCE IN COMMUNITIES

EPA REGION 3 ECONOMIC PROFILE – DATA SUPPLEMENT (2022 DATA)

: Total number of sites in use per state.

The cleanup and reuse of Superfund sites often restores value to site properties and surrounding communities negatively affected by contamination. Site redevelopment can revitalize local economies with jobs, new businesses, tax revenues and spending. EPA also works to ensure that existing businesses on properties being cleaned up under Superfund can continue operating in a way that protects human health and the environment, enabling these businesses to remain open and serve as a source of jobs and income for local communities. EPA tracks current and former Superfund sites in use across the country. Each year, EPA researches the beneficial effects of redevelopment and continued use of these sites.

This profile looks at how EPA’s effort to safely support long-term uses and facilitate redevelopment at Superfund sites makes a difference in communities across Region 3, including communities that experience environmental and economic burdens. It also provides the land values and property taxes associated with Superfund sites returned to use and sites remaining in use throughout the cleanup process.

In Reuse	<i>Part or all of a site is being used in a new, different manner than before Superfund involvement. Or, the property was vacant and cleanup was designed to support a new, specific land use.</i>
In Continued Use	<i>Historical uses at a site remain active, and/or the site is still used in the same general manner as when the Superfund process started at the site.</i>
In Reuse and Continued Use	<i>Part of a site is in continued use and part of the site is in reuse.</i>

¹ Twenty-two sites are federal facilities. Federal facility sites are excluded from all other site and business data above.

³ The property value and tax amounts reflect the latest property value year and tax data year available in county assessor datasets, which varied from 2020 to 2022. Detailed property value data (land and improvements) as well as tax data were not available for every site.

⁴ Property value and tax data were not available for the two sites in the District of Columbia.

REGIONAL DATA — TOTAL ANNUAL SALES

TOTAL EMPLOYEES

13,903 EMPLOYEES

TOTAL ANNUAL EMPLOYEE INCOME⁵

EPA collected economic data for 557 businesses, government agencies and civic organizations operating at 77 National Priorities List (NPL) sites and four non-NPL sites in reuse and continued use. The businesses and organizations at these sites generate about \$3.9 billion in estimated annual sales and employ about 13,903 people who earn an estimated \$1 billion in annual employment income. This income injects money into local economies and generates revenue through personal state income taxes.
