Washington, D.C. 20510

The Honorable Lisa Murkowski
Ranking Member, Subcommittee on Interior,
Environment, and Related Agencies
Committee on Appropriations
United States Senate
Washington, D.C. 20510

Dear Chairman, Chair, and Ranking Members:

Enclosed is the U.S. Environmental Protection Agency's Fiscal Year 2023 report to Congress on the status of Superfund projects funded by the *Infrastructure Investment and Jobs Act* (Public Law 117-58). The IJA instructed the EPA to provide annual reports, specifically:

...Provided further, That the Administrator of the Environmental Protection Agency shall annually report to Congress on the status of funded projects...

The agency appreciates Congressional interest and support of its Superfund Remedial Program. The EPA looks forward to working with Congress to advance important cleanup work at Superfund National Priorities List sites across the United States.

If you have further questions or would like to set up a meeting to discuss this report, please contact Ed Walsh at (202) 564-4594 or walsh.ed@epa.gov.

Sincerely,

**FAISAL
AMIN**

Enclosure

FISCAL YEAR 2023 REPORT TO CONGRESS**Superfund Sites with Projects Funded with Infrastructure Investment and Jobs Act Funds****BACKGROUND**

The Infrastructure Investment and Jobs Act (IIJA) of 2021 [also referred to as the Bipartisan Infrastructure Law (BIL)], signed into law on November 15, 2021, provided \$3.5 billion for the Superfund Remedial program, waived the cost share required by states for remedial action projects at Superfund sites, and directed EPA to annually report to Congress on the status of funded projects.¹ Most of the \$3.5 billion is dedicated to EPA-financed remedial action construction projects at non-Federal National Priorities List (NPL) sites. EPA used infrastructure funds to initiate work on all NPL sites with previously backlogged remedial action construction projects and continues to use infrastructure funds to start additional new construction projects when they are ready and accelerate ongoing cleanups at NPL sites where no other sources of funding are available.² Since passage of the law, EPA has been identifying NPL sites to receive funding and using the investment to ensure communities living near many of the most serious uncontrolled or abandoned releases of contamination get the protections they deserve.

SITES WITH PROJECTS FUNDED BY BIL

In FY 2023, EPA obligated approximately \$1.0 billion for extramural work at 116 Superfund sites on the NPL.³ EPA has obligated a net total of \$2.06 billion in BIL funds for construction work at 152 Superfund sites on the NPL since those funds became available. This includes:

- Approximately \$1.6 billion at 109 NPL sites in communities with the potential for environmental justice concerns, according to data from EJSCREEN 2.1.
- Approximately \$310 million at 19 NPL sites with Native American Interest. (Native American Interest indicates that one or more Indian tribes is directly or indirectly affected by a potential or known release at that site.)

This report provides a list of the Superfund NPL sites that received BIL funding through September 30, 2023. Table 1 provides the net amount of BIL funds obligated by region and state or territory. Table 2 provides a list of sites with construction projects funded either in whole or part with BIL funds in FY 2022 and/or FY 2023. Each site name is hyperlinked to its site profile page where more information can be found on the status of cleanup for that site.

It is important to note that while BIL funds were obligated in FY 2022 and FY 2023 for construction projects in order to maximize the waiver of cost share for states required by the

¹ For more information, please see, page 970: <https://www.congress.gov/117/plaws/publ58/PLAW-117publ58.pdf>.

² For more information, please see: <https://www.epa.gov/infrastructure/cleaning-superfund-sites-highlights-bipartisan-infrastructure-law-funding>.

³ Excludes amounts obligated and/or disbursed for management and oversight program activities and intramural costs such as payroll and travel.

Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), a significant amount of work occurred using annually appropriated funds for pre-construction activities at sites across the country, including remedial investigations, remedial designs to prepare sites for remedial action construction, technical assistance, laboratory analysis, community involvement, and cooperative agreements for state, tribal, and local government participation in the cleanup process. BIL funding allowed Superfund NPL sites across the country to move forward with important cleanup work, either directly with BIL funding or indirectly by making more annually appropriated funding available for pre-construction activities.
